While Controlling Canal for Period

S. Willing to Revise Panama Pact

AMA CITY, March 20 The United States told nited Nations Security here today that it is o conclude promptly a aty on the Panama Canal

Ambassador John Scali said the United States nevertheless believes it is necessary for it to maintain control of canal operation and defense for a period of time to be negotiated with Panama.

Mr. Scali, in his first full-dress speech as the new U.S. ambassador to the UN, used a moderate tone to answer assertions that the United States should give Panama a new deal on the canal and turn over sovereignty and jurisdiction to Panama.

Negotiations Started

Mr. Scali's remarks at the special Security Council session followed a night of negotiations between U.S. and Panamanian envoys on a possible compromise resolution dealing with the canal.

The Security Council is holding an extraordinary week-long meeting in Panama City at the request of Panamanian officials who wanted to focus world attention on the 550-square-mile Canal Zone bisecting their tiny country.

The United States controls the zone and the canal "in perpetuity" under a 1903 treaty. The Panamanians want the Canal Zone turned over to them, calling the zone a "colonialist enclave" in the heart of their country.

The United States came to Panama with mixed feelings about the Security Council session, feeling that current negotiations between Washington and Panama would be ill-served by the ensuing publicity over the zone issue.

Treaty Revised Twice

In his address to the council, Mr. Scali pointed out that the original treaty has been revised twice since 1903 and that the United States realizes the need for a completely new treaty.

In connection with U.S. defense of the Canal Zone, where 11,000 U.S. troops are stationed, Panamanian Foreign Minister Juan Antonio Tack said today that Panama would have no objection to the United States defending the canal as long as it was for a specified period to be worked out by both sides.

In an address yesterday, Soviet envoy Jacob Malik, although agreeing that the canal "belongs to Panama," emphasized what it termed the need "for a settlement of the Panama Canal issue that would insure jurisdiction of Panama over its full territory and also ensure the freedom of world shipping" on the waterway.

ıy Ordered Not to Answer ıstantive Queries on Probe

By Fred Farris

SHINGTON, March 20 —L. Patrick Gray 3d today he was ordered rney General Richard G. nist not to answer "sub-" questions about the obe into the Watergate

Dollar Rises In Europe

PARIS, March 20 (IHT).—The dollar weakened in early trade on Europe's major foreign exchange markets today, but rallied and finished above yesterday's closing rates in most centers.

Trading was described as quiet and still very much influenced by the backed-up demand for dollars resulting from the two-week shutdown of central banks, which had kept foreign exchange trading to a minimum. Page 7.

Assembly Replaces Parliament

Britain Offers Plan to Give Ulster Catholics More Power

By Alvin Shuster

LONDON, March 20 (NYT).—The government announced today its long-awaited plan to ensure a share of political power for the Roman Catholic minority in Northern Ireland.

In a white paper setting forth firm policy, the government provided its most far-reaching proposals so far to bring an end to the strife between Catholics and Protestants in the British province. The plan is aimed at reshaping its political structure, which for 50 years has left the reins of power in the hands of the Protestant-dominated Unionist party.

The announcement in the House of Commons came almost a year after the British government suspended the provincial government and Parliament of Northern Ireland and imposed direct rule from London. Since then, the British have searched for the formula announced today.

Under the proposals, the suspended Parliament would be replaced with an 80-seat assembly elected under a system that would give Catholics a fair share of seats.

The assembly's committee chairmen, also including Catholics, would make up the executive group that would run various departments, such as education, housing and health.

"The executive itself can no longer be solely based upon any single party, if that party draws its support and its elected representation virtually entirely from only one section of a divided community," the white paper said.

In time, the assembly would take on increasing powers, but the responsibility for law and order and the police would remain indefinitely under London's control.

The reforms, spelled out in a document called "Northern Ireland Constitutional Proposals," will be presented to Parliament in a series of six measures in the coming weeks. British officials expect them to be approved without much delay, enabling elections for the assembly to be held later this year.

Whether the plan will bring peace to the troubled province remains to be seen. Prime Minister Edward Heath, aware that he cannot please the extremists on either side, is counting on Protestant and Catholic moderates to insist that the system be given a chance.

The response, even from the hardliners, was guarded. Moderates generally found something worthwile in the plan.

[In Dublin, the new government of Premier Liam Cosgrave welcomed Britain's proposals, but expressed regret at the lack of definite plans for a council of Ireland, Reuters reported.

[A government statement said the white paper contained facets "which could help toward a solution." It welcomed the proposed system of power-sharing between the North's Protestants and Catholics, but said the plan needed further clarification. And it noted "constructive elements," including plans to guarantee human rights and prevent discrimination.]

"We need the goodwill of everyone to make it work," said William Whitelaw, who has been the secretary of state for Northern Ireland since the British take-over. "We knew we couldn't please everyone. But it is a reasonable deal for reasonable people. The unreasonable will always find reasons why it will fail. They will say that the power-sharing won't work. I say that it must work."

Underlying the white paper is the effort to provide something acceptable to both Catholics and Protestants in hopes of ending the killing. It does not, of course, meet the extremists' demands.

Some Protestant spokesmen, for example, had demanded a complete return to the old days of a full-fledged Parliament with complete control over the police.

What they got was a renewed assurance from London that Northern Ireland would remain part of the United Kingdom as long as that was desired by the majority of the people. The Protestants have long feared that the British would agree to let the province be reunited with the Irish Republic to the south with its 95 percent Catholic population.

For the Catholics who look to the day of Irish reunification, the white paper provides for a conference between representatives of the province and the independent republic to find ways of working together. The conference would be called after the elections to the new assembly and would discuss, among other proposals, the idea of establishing a formal "Council of Ireland."

Some Catholics had urged that the government's legislation include a specific plan for the creation of the council. But Mr. Whitelaw said that the body would have little chance of success in dealing with such issues as tourism, regional development and transportation unless there was first a show of willingness by both sides in Northern Ireland to pursue the idea.

The white paper said that those who wanted a united Ireland must realize that this could be brought about only on the basis

(Continued on Page 2, Col. 4)

The Main Proposals

- Establishment of a new 80-seat assembly elected by proportional representation which would give the minority Catholics a greater voice in running the province. It would replace a 52-seat Protestant-dominated Parliament suspended by Britain almost a year ago.
- Creation of a Secretary of State for Northern Ireland who would have cabinet ranking in the British government and executive responsibility for law and order.
- A conference between representatives of Northern and Southern Ireland aimed at exploring ways of closer cooperation. This appears to recognize the Irish Republic's legitimate interest in affairs in the North.
- A pledge that Northern Ireland shall remain part of the United Kingdom so long as the majority of its people desire it.
- A pledge by the British government that the British Army will remain at whatever strength needed to safeguard security.
- A new charter of human rights guaranteeing everyone freedom from discrimination on grounds of political or religious belief. This was mainly designed to protect the interests of the Catholic community.
- A new bill to deal with violence and subversion, replacing the controversial Special Powers Act which has inflamed Catholic opinion because of its provision for detention without trial.

May Help Dampen Violations

Vietnam Truce Teams in Field Start Probes

By Charles Mohr

SAIGON, March 20 (NYT).—After weeks of inactivity, field teams of the International Commission of Control and Supervision have begun to investigate the frequent and continuing violations of the cease-fire in Vietnam.

Most of the actions have been described as "observations" rather than formal investigations and few have resulted in unanimous findings of culpability.

However, it seems possible that, simply by moving about the countryside from time to time, the ICCS teams may inhibit the tendency of both the Viet Cong and the South Vietnamese to continue the shooting, in the opinion of some American officials.

More than 20 such observations or investigations have taken place in the populous Mekong Delta within recent days, sources reported.

ICCS mid-level personnel said that similar activity was taking place in some other areas of the country.

That such actions are finally under way, seven weeks after the cease-fire agreement came into effect, reflects some changes in attitude among the Canadian, Hungarian, Indonesian and Polish delegations that make up the international commission.

When they first arrived in South Vietnam in late January, senior ICCS personnel of all four nations made clear they expected certain conditions to be met before they began the job of investigating violations—which is only one of the ICCS tasks assigned in the cease-fire agreement.

For one thing, the ICCS wanted the two South Vietnamese parties —the government and the Viet Cong—to demarcate zones of control "so we will know where they are." The ICCS leaders also insisted initially that nothing could be done until the Four-

Mrs. Nixon Says Brezhnevs Are Due in U.S. Soon

WASHINGTON, March 20 (UPI).—Soviet leader Leonid I. Brezhnev and his wife will visit Washington "soon," Mrs. Nixon said today.

She declined to name the date but she told reporters, "I think it's already set."

There has been widespread speculation that the Brezhnev visit would come in June in response to President Nixon's Moscow trip last May.

Pollution: A Horror Story From Japan

By Richard Halloran

TOKYO, March 20 (NYT).—apanese court ruled today a major chemical company responsible for the mercury oning of hundreds of people ne town of Minamata over last 20 years.

e ruling was the last in four r court cases here that have a legal precedent, making strial companies liable for ffects of their pollution. The cases have also been instrual in arousing Japanese nds for a cleanup. This is aps the most polluted na- in the world.

e Kumamoto District Court ed the Chisso Corp. to pay tal of $3.6 million to 138 tiffs representing 30 families.

e president of Chisso, chi Shimada, said the rul- will not be appealed. The pany makes aceto-aldehyde ts Minamata plant, from h organic mercury waste was harged into a nearby bay.

e mercury got into fish and fish eaten by people in mata and caused mental age, paralysis, loss of hear- speech and sight, and death. so caused some babies to be born retarded or crippled for life.

Death, Crippling, Brain Damage— 30 Families Awarded $3.6 Million

In the 20 years since the disease claimed its first victim, the Japanese government has determined that 397 persons have been victims of the illness in Minamata, of whom 68 have died.

The first of the four pollution cases to be completed was in Septembr, 1971, when the Showa Denko Co. was found liable for causing the disease in Niigata, in northwestern Japan.

It was ordered to pay $810,000 in damages. The government has found 330 victims of the disease there, of whom 13 have died.

In July, 1972, six petrochemical companies in Yokkaichi, in central Japan, were ordered to pay $285,000 for air pollution that caused what is known as "Yokkaichi asthma." The government has discovered 1,054 victims, of whom 76 have died.

Last August the Mitsui Mining and Smelting Co. was ordered to pay $480,000 for dumping cadmium waste that got into water used for rice irrigation. That caused a condition in many people in which the victim's skin and bones become painful to the touch. The government has found 265 victims of the disease, of whom 47 have died.

Minamata is a small fishing town on Shiranui Bay. Shortly after the end of World War II, Chisso, then called Nippon Nitrogen, resumed production in its plant there. It was the only big industry in the town, and about 70 percent of the local economy was dependent on it.

By 1950 the fishermen noticed that fish were dying inexplicably, mostly with their mouths wide open. In 1953 the first human was a victim of the then mysterious disease.

About the same time, cats that had eaten discarded fish scraps went into wild gyrations and dances and then died in agony. Pigs and dogs fed fish went mad and crows that had eaten scraps fell from the sky.

In 1956 researchers at Kumamoto University began to investigate. About two years later they announced they had traced the cause of the strange illness to mercury poisoning. It was called Minamata disease.

The researchers said they believed the mercury had come from industrial wastes dumped by Chisso. That so angered the town's fishermen that they twice broke into company offices on a rampage.

Many citizens whose livelihood depended on the company defended it, as did the mayor and some of the town councilmen who were company employees. But in 1959 Chisso paid the fishermen a total of $100,000 in compensation for damage to the fishing grounds.

Earth Day

UNITED NATIONS, N.Y., March 20 (AP).—A top UN official marked Earth Day today with a promise that the United Nations would "do its utmost to contribute to the preservation of the earth." Under Secretary-General Chaurasi Narasimhan said the earth must be protected both "from the scourge of war and from the dangers inherent in the advent of our global age."

He spoke just before ringing the UN's Japanese-donated peace bell in observance of the environmental holiday.

U.S. Rejects Proposed Fares Of 7 More Foreign Airlines

By Jack Egan

WASHINGTON, March 20 (WP).—New low transatlantic fare proposals for seven international airlines were rejected today by the Civil Aeronautics Board. The fares were scheduled to go into effect April 1.

However, the action—following a similar suspension of four European carriers' fare packages by the CAB last month—is expected to have minimal impact. The International Air Transport Association, a price-setting organization of world airlines, decided in London last week to retain the status quo fare structure—at least through the end of the year.

The only change in fares will be upward—an adjustment to take into account the recent devaluation of the dollar and other currencies. Increases will range between 6 and 11 percent, depending on the country and route, and will take effect April 15.

The CAB still has to approve an extension of the status quo fares. It is expected, however, that the board will do so rather than inject further confusion into the North Atlantic fare situation.

Today's suspensions were directed at Air Afrique, Czechoslovakia Airlines, El Al Israeli Airlines, Finnish Air, Iberia Airlines, Irish International and Transportes Aeros Portugueses.

The reasoning behind the rejections was the same as when the CAB suspended fares for BOAC, Lufthansa, Olympic and Alitalia last month. The board contends that some of the fare proposals, particularly the 14-to-45-day advance purchase excursion fare, are too low to be economically profitable for the airlines flying the route.

U.S. air carriers have contended that they need fares that are more nearly compensatory for the actual costs involved in flying passengers across the North Atlantic. Foreign airlines, particularly BOAC, have insisted that proposed low fares would be profitable and also necessary to compete with nonscheduled charters.

The CAB, in suspending the tariffs, effectively wipes the slate clean for whatever follows the termination of the present fares after Dec. 31 this year. Carriers are expected to submit new proposals and another round of negotiations between airlines has already been scheduled by IATA.

Hundreds Ejected From Law School

Police, Students Clash at Athens U.

ATHENS, March 20 (AP).—Police today stormed Athens University's law school and forcibly ejected hundreds of students staging a sit-in to demand greater academic autonomy.

More than a dozen students and 11 policemen were injured and 30 students arrested, a government announcement said later. It added that the students were being released after questioning.

Hundreds of students chanted anti-government slogans and unfurled a banner reading "Americans Get Out." It was the first time in the two-month-long student protest that anti-American feelings came into view.

Strong police units waited hours for their chance to enter the law building. As the students gathered on the roof, taunting police in the streets below, fire ladders were brought to the scene. With the university officials' permission, police then scurried up the ladders to the top of the building and stormed the entrances below. Fights with students broke out as policemen used their clubs to force them out of the law school.

Students ran out of the building and later regrouped on corners near the school to shout at police. They fled up side streets under the threat of police charges before calm returned to the area.

The university senate later issued a statement calling the student gathering "illegal" and saying that police were called in to clear out the school.

On the roof of the university building in central Athens the students shouted, "Democracy" "Freedom for the Press" and "Papadopoulos Get Out"—referring to Premier George Papadopoulos, head of the army-backed Greek government.

The anti-American banner was considered a reflection of the view widely held here by opposition groups that U.S. support has maintained the military-based regime in power for six years.

It was the second time in three weeks that law students had taken over their school.

While some students gathered on the roof, others met in rooms below to take a public oath that they would "struggle to the end," to secure all academic liberties and the release of all students who have been detained by police.

Today was scheduled to be the final day of negotiations between students and Athens University officials on student grievances. Negotiations have been conducted periodically for the past month interspersed with student scuffling with police in the streets and campus demonstrations.

Though dissident student committees were unavailable for comment, the protest at the law school was interpreted by observers as a sign of deadlock in the negotiations.

At Patras University, in Southwestern Greece, students occupied the main university building for four hours today.

Police units stood by, but did not intervene at the insistence of school authorities. The students finally filed out of the building peacefully.

Most of Patras University's 2,300 students, who have been boycotting classes for the past five weeks, plan to remain away until Friday. The students are abstaining from classes in sympathy with their colleagues at other universities, who are demanding academic asylum and the repeal of a decree giving the government authority to draft dissenting students into the army.

Belfast newspaper vendor swamped by customers buying copies of the Ulster report.

Vietnam Truce Teams in Field Start First Probes of Violations

(Continued from Page 1)

Party Joint Military Commission, composed of the formerly hostile parties, was fully operational.

None of this proved practicable and for weeks the ICCS accomplished little more than to set up housekeeping in seven regional team sites and more than 20 subregional sites in rural South Vietnam.

Other factors hampered any effective ICCS action, sources said. One was the suspicion and alarm with which the teams were often treated by South Vietnamese government administrators and military officers in the field.

In one location the local province officials repeatedly tried to force the hiring of secret police as part of the ICCS team local staff. In other areas, sources said, province and military officials avoided contact with the teams and offered little cooperation.

This situation changed dramatically more than a week ago when President Nguyen Van Thieu held a conference in Saigon with province chiefs and other key officials. Sources said he told the conference that better implementation of the cease-fire was in the national interest and that the ICCS was to be treated "as honored guests." He also permitted more friendly treatment of Communist delegates on the Joint Military Commission.

Dramatic Change

"The change was quite dramatic after that," said one American in the field.

At the same time, the small local ICCS teams began to take local initiatives and to look into complaints of fighting in violation of the accords. Technically a full "investigation" must be ordered by unanimous decision of the ICCS ambassadors in Saigon, but the local teams have begun to make observations on their own.

Since there are almost no Viet Cong and few North Vietnamese in place in many of the team sites shared by ICCS and Joint Military Commission groups, almost all of the observations have been of South Vietnamese complaints.

Examples include mortar attacks, rocket barrages and small ground attacks against government outposts and villages.

In only one case, a visitor was told, had the ICCS team unanimously agreed that the incident was caused by hostile Viet Cong action.

"In most cases the Canadians and Indonesians seem to put the blame where it appears to belong. The Hungarians and Poles look around, admit there has been an explosion and that there is blood but say they can't determine who was to blame," said an official.

The reports, which are not "official" since they are not unanimous, are evidently sent on to the individual senior officials of the member countries in Saigon.

Feeble as these efforts are, they do seem to represent an improvement over the previous paralysis of the ICCS.

U.S. Weighs Extension

SAIGON, March 20 (AP).—The United States is considering proposing an extension of the Four-Party Joint Military Commission beyond its expiration date March 28, U.S. sources disclosed tonight.

The objective would be "to create a better atmosphere for a true and realistic cease-fire" and to accomplish many tasks left undone, one source said.

Such a proposal also might help the United States to maintain a forum for its charges that North Vietnam is infiltrating large numbers of troops and war materials southward, and preclude resumption of large-scale hostilities.

Phnom Penh Fears Another Solo Air Raid

PHNOM PENH, March 20 (UPI).—New American-built anti-aircraft guns today ringed the presidential palace, target of a weekend solo air raid.

"We aren't taking any chances," a palace source said. "Potra still has the plane and he could come back and try again."

So Potra, a former Royal Cambodian Air Force pilot and son-in-law of deposed Prince Norodom Sihanouk, was identified as the pilot who stole a propeller-driven T-28 and dropped two 250-pound bombs in the palace compound Saturday.

The bombs scored a direct hit on a new military barracks, setting off secondary ammunition explosions and fires, leaving 47 dead and at least 50 wounded. Mr. Potra flew away unchallenged after the raid.

State of Siege

President Lon Nol said he was the target of an assassination attempt and declared a state of siege, suspending all constitutionally guaranteed civil liberties.

Police arrested more than 100 persons, including 16 members of the royal family and 30 leaders of a month-old teachers' strike. Mr. Potra's wife was among those arrested.

In a move to cut off escape routes to suspected subversives, the government closed all frontiers and prohibited anyone from leaving the country without a special permit.

Protests from several embassies over the restrictions on their citizens brought some easing, but most departing flights continued to be three-fourths empty.

Saturday's attack on the palace followed the break-up of an anti-government meeting of thousands of strikers by men in civilian clothes who tossed fragmentation grenades into the meeting compound, killing two persons and wounding ten.

Students Return To Barcelona U.

BARCELONA, March 20 (AP).—Barcelona University students today ended a five-week strike in support of higher pay for temporary professors. Barcelona University, with 30,000 students, is the largest in Spain.

Classes resumed for the first time since the university was closed a month ago after student-police clashes.

Officials blamed the disturbances on provocations by leftist groups.

Three Get Death In Rhodesia for Possessing Arms

SALISBURY, Rhodesia, March 20 (UPI).—The Rhodesian High Court today sentenced three Africans to death for possessing arms.

The three men, whose names were withheld, had pleaded guilty to contravening Rhodesia's Law and Order Maintenance Act.

After passing sentence, Judge Eric W. Jarvis said a decision to carry out the sentence rested with the government.

Six persons have now been sentenced to death in Rhodesia since early March. On March 7 three were given the death sentence for murdering an army corporal, who died in a land-mine explosion while on patrol.

Meanwhile, the trial of journalist Peter Niesewand under Rhodesia's Official Secrets Act ended here today after closed-door hearings lasting seven hours. Mr. Niesewand, 28, was remanded in custody until March 30, when Regional Court Magistrate J.E.T. Hamilton will give judgment.

The journalist, local representative of a number of major international news organizations, had pleaded not guilty to two sections of the act which carry possible sentences totaling 25 years imprisonment or a fine of 20,000 Rhodesian dollars ($27,800).

Sirhan Brother Held in Threat To Mrs. Meir

LOS ANGELES, March 20 (AP).—A brother of the convicted assassin of Sen. Robert F. Kennedy has been arrested by the FBI and indicted by a federal grand jury on a charge of making a threat against the life of Israeli Premier Golda Meir.

Sharif Bishara Sirhan, 29, was held in $50,000 bond after his indictment and arrest yesterday. The FBI said the threat was contained in a letter addressed to Secretary of State William P. Rogers a month ago.

Details of the threat were not revealed.

Sharif is the elder brother of Sirhan B. Sirhan, now serving a life term in San Quentin Prison for the 1968 slaying of Sen. Kennedy. Sharif, who contends his brother is innocent, is a Jordanian national who espouses Palestinian causes.

His arraignment is scheduled for today. Maximum penalty upon conviction could be a $1,000 fine and/or five years in prison.

He was arrested at his residence in nearby Pasadena without incident, the FBI said.

Goodpaster Renamed

WASHINGTON, March 20 (Reuters).—Gen. Andrew Goodpaster, '58, supreme commander of NATO forces in Europe, was reappointed to his post by President Nixon today for a further two years.

Bank Is Robbed By Woman, 78

PROVO, Utah, March 20 (UPI).—Police arrested a 78-year-old woman yesterday on charges of holding up a local bank and taking $1,500 after pulling a toy pistol from under her sweater.

Mrs. Geneva G. P. Ball was arrested in an office-supplies store around the corner from the bank and the money was recovered, police said.

U.K. Offers Catholics More Power

(Continued from Page 1)

of consent, which does not "at present" exist. Therefore, it said, they had an obligation, "without prejudice to their aspirations," to assist in "the achievement on a constitutional basis of peace, equality and prosperity."

"The true interests of the whole community in Northern Ireland require that the majority should not fail in fairness and generosity toward all their fellow citizens and that the minority should play a truly constructive part," the document said. Protestants outnumber Catholics by two to one—1 million to 500,000.

As further inducements for Catholic support, the government also pledged a new charter of human rights to guarantee freedom from discrimination. It said a standing committee on human rights would watch for discriminatory practices and a bill would be introduced in Parliament to bar job discrimination in private industry in Northern Ireland.

To Protestants worried about the loss of their old Parliament, Mr. Whitelaw emphasized that the assembly would still give the province "a greater degree of self-government than any other part of the United Kingdom." He said both the majority and minority communities would have the chance "to play a full part in dealing with issues and procedures of crucial domestic importance."

The elections to the new assembly will be vital in determining the chances of success of the white paper. The whole concept could falter if either key Protestants or Catholic leaders found the proposals lacking and called on their followers to boycott the voting, expected sometime later this year.

If it goes according to plan, however, the real bargaining over the share of power would begin after the new assembly members take their seats. Since the voting would be under a complex system of proportional representation, Catholics would be expected to play a meaningful role.

The leaders of the political parties in the assembly would then meet with Mr. Whitelaw. They would decide on the appointment of committee chairmen, who would include Catholics. These chairmen would then become the ruling executive of the province—in place of the old cabinet system—and would run the various departments.

In explaining the procedure today, Mr. Whitelaw said the leader of the largest party in the assembly would presumably be picked to be the chief executive. Thus, the old job of prime minister, held by Brian Faulkner, the Unionist leader who resigned with London's direct rule, would be abolished.

Until the new assembly and executive began working, the powers of government would reside with Mr. Whitelaw and the British Parliament. The authority for direct rule will be extended for another year.

"These proposals are designed to benefit the law-abiding majority in both communities, who may have conflicting views on the ultimate constitutional destiny of Northern Ireland, but who seek to advance those views by peaceful democratic means alone and have strong mutual interest in making social and economic progress," the white paper said.

Catholic Youth Slain

Ulster Protestant Militant Calls U.K. Plan Unacceptable

BELFAST, March 20 (UPI).—A Northern Ireland political leader today greeted Britain's plans for the province's future with harsh words, but the extremists withheld their bombs.

William Craig, a militant Protestant, called the British white paper issued in London today "unacceptable."

In Dublin, spokesmen for both wings of the outlawed Irish Republican Army said there would be no immediate comment on the white paper. The Irish Republic government also withheld comment.

But the violence continued. A 16-year-old Catholic boy was shot dead from a speeding car in Belfast's Grosvenor Road tonight. He was the 753d fatality since August, 1969. Another Catholic youth was seriously wounded in the burst of fire.

"The proposals are unacceptable and we shall now set about making them unworkable," said Mr. Craig, chairman of the Ulster Loyalists Council. "We shall be having a meeting tomorrow and no doubt a common strategy will be agreed."

Brian Faulkner, leader of the Unionist party and the last Northern Ireland prime minister before the province came under direct British rule last March, said, "There can be no snap judgment until the paper has been studied. But I welcome the decision-making coming back to the people where it belongs.

"The IRA is not interested in any paper solution whether it is white, green, or orange," Mr. Faulkner said.

Playing It Cool

Although the IRA denied it planned a cease-fire for the white paper, a British Army spokesman said, "There's no doubt the IRA seems to be playing it cool. The scale of violence the past 36 hours has been lower than during their formal cease-fire last June."

A spokesman for the Protestant paramilitary Ulster Defense Association said many UDA leaders had "gone underground" for fear of army raids on their homes.

Army sources said 2,500 reinforcements were on standby alert in Britain and West Germany for airlift to Northern Ireland if necessary. Britain already has 17,500 soldiers in the province.

The army said troops had arrested 25 suspected extremists in the past 24 hours: 13 Protestants and 12 Catholics.

Tight security also was the order of the day in Britain and the Irish Republic.

In London, police banned parking in some areas and checked suspicious cars to prevent more bombings like those of March 8 in which one man died and 259 other persons were wounded. Cars of Parliament members arriving at the House of Commons were searched and police even poked through the briefcases of some members of Parliament.

In the Irish Republic, troops and police manned checkpoints along the border and patrolled sea and airports in force.

Hotel Bombed

The violence today included a bomb that ripped through a small Belfast hotel, the Parador, causing a fire that gutted the building. Police said four men who planted the bomb shouted a warning that sent people fleeing. One woman employee who collapsed on the street was hospitalized for shock.

Another fatality in the three-sided violence among Protestants, Catholics and security forces was 18-year-old Robert Collins, a Protestant. Kidnapped in Belfast's Catholic Ardoyne district and shot in the head Sunday, he died last night.

Full Traffic Is Seen by Friday As French Air Strike Ends

PARIS, March 20 (Reuters).—French civilian air controllers returned to work today, ending a 28-day strike that crippled air traffic in France.

At Orly airport, 341 landings and take-offs were scheduled today, compared with about 200 yesterday, the last day military air controllers were on the job. The prestrike average was 600.

Air France and the main domestic airline, Air Inter, said they would return to full operation by Friday. All of Air France's long-range flights were scheduled to resume today. An Orly spokesman said he expected traffic to be normal by Friday.

Both nonstriking civilian controllers and members of the union that called the walkout began returning to work at 8 a.m. —after air traffic over France was totally interrupted for eight hours, during which the military handed control back to the civilians.

Although the union has only 300 of France's 1,500 air controllers, it has senior personnel, and the walkout had a crippling effect.

Government Action

On Feb. 24, the government replaced the entire civilian system with military air controllers. Two Spanish airliners collided near Nantes on March 5 and 68 persons died. After the collision, most foreign airlines prevented their flights from going into or over France.

Union members voted early this morning to return to work even though the government did not accede to their demands, which included a wage increase, the right to strike legally—denied them since 1964—and the lifting of sanctions taken against union leaders because of the illegal strike.

It was expected that negotiations between the union and Transport Minister Robert Galley would begin soon.

Air France estimates that it has lost from 150 to 200 million francs from the strike and Air Inter put its losses at between 30 and 40 million francs.

British Air Strikes

LONDON, March 20 (UPI).—Two strikes at major international airports to protest government wage-increase ceilings had little effect on flights today.

Thirty teletype operators at Prestwick Airport in Scotland ended a 12-hour walkout that delayed flights only a few minutes at most. At London's Heathrow Airport, 120 computer operators struck for 24 hours.

Union leaders said radar personnel in the north of England would strike today.

Kuwait, Iraq Report Troop Clash Along Common Bord

KUWAIT, March 20 (UPI).—Iraqi troops and Kuwaiti border guards clashed today in a region of their 150-mile border long disputed between the two nations.

The Kuwaiti government charged that Iraqi troops seized one border post and shelled another. It said that four Kuwaiti policemen were wounded in the attack and "a number of other policemen are missing."

The Kuwaiti parliament and cabinet met in emergency sessions a few hours after the 3:10 a.m. clash. The parliament issued a statement that said: "The parliament calls on the Iraqi government to withdraw its forces immediately from the al-Samitah border post and cease all activities in the border area."

According to the Kuwaiti announcement, the Iraqis seized the border police post at al-Samitah and staged "an artillery attack on the Um Kasr border post."

Disputed Territory

Both these posts are in the extreme northeastern tip of Kuwait. This region has been disputed territory since Kuwait became independent in 1961.

More than 10 hours after the clash, Baghdad radio broadcast a government statement that said, "Kuwaiti forces in the area were first to open fire on Iraqi forces undertaking normal training exercises.

"The Iraqi troops were forced to return the fire and suffered several casualties," the statement said.

The Iraqi news agency said later that two Iraqi soldiers were killed and several wounded in the clash.

"The Interior Ministry expresses deep sorrow over this Kuwaiti attack, which comes at a time when the two countries are exchanging official visits aimed at strengthening brotherly relations between the two countries," the agency dispatch said.

In Kuwait, where anti-Iraqi demonstrations broke out after the clash was announced, extra police were rushed to guard the Iraqi Embassy, the Middle East News Agency reported.

A state of emergency was declared in Kuwait. Security cautions were taken at the port and army patrols m roadblocks in the country.

Kuwait faced an imm shortage of foodstuffs as o traffic with Iraq came to Kuwait imports 80 perc its daily needs of vege fruits and meats from Le Jordan, Syria and Turkey th Iraq.

Lebanese President Su Franjieh, King Hussein of and the ruler of Bahrain, Isa bin Salman al-Khalifel phoned the Emir of Kuwait el-Salem al-Sabah, to expre pathy, the government anno

Black September Suspects Remain In Paris Custody

PARIS, March 20 (UPI).—Police today continued to question a Jordanian man and a British woman arrested for possible Black September terrorist connections.

Custody permits for the two individuals, whose identities were not disclosed, were extended by 24 hours, giving police more time for questioning before the man and woman must appear before a court.

The two suspects were arrested on Friday on the strength of information supplied by two members of Black September, the Palestinian terrorist group, arrested last Wednesday on the French-Italian border.

Police said the woman was a 28-year-old British doctor and had been traveling on her own passport. The man might be charged for using false papers, the police said.

35 More Moscow Jews Ge Waivers on Emigration T

MOSCOW, March 20 (UPI).—Thirty-five Moscow Jews received permission today to emigrate without paying the so-called education tax, bringing to 44 the number of waivers granted in two days, Jewish sources said.

There was no explanation from Soviet officials for the exemptions. They began five days after the departure of U.S. Treasury Secretary George P. Shultz and there was speculation that they resulted from his talks with Communist party General Secretary Leonid I. Brezhnev.

The tax was imposed last August, ostensibly to prevent a brain drain and to reimburse the state for the expenses of free higher education. Educated persons were required under the measure to pay fees up to the equivalent of $30,000 for the right to emigrate.

Trade Status at Issue

The tax unleashed a controversy abroad and has become a stumbling block to increased Soviet-American trade. A majority of both houses of Congress has said it will oppose granting the Kremlin most-favored-nation trade status unless the tax is abolished.

Most of those given exemptions today were called into agency office in central but some went on initiative and were could leave, the source

onfidential Papers Suggest op Nixon Aides Helped ITT

By Laurence Stern

ASHINGTON, March 20 —In defiance of the Nixon nistration, a House of Reptatives subcommittee yesternade public a mass of conial government memoranda sting that top presidential helped the International hone and Telegraph Co. in troversial anti-trust suit.

use Commerce Subcommittee nan Harley O. Staggers, D., Va., released more than ages of internal Securities Exchange Commission work s, saying that SEC chairG. Bradford Cook had offer- compelling reason" to back e agency's demand that the ial be kept under lock and

case centered on ITT's aign in 1970 and 1971 to ve its merger with the \$2- Hartford Fire Insurance

memoranda were hurriedly ed and scribbled by hand C investigators just before orporate files upon which were based were hauled off e Justice Department by truck in 34 cartons a month the 1972 presidential elec- Former SEC chairman Wilasey told the Staggers subittee in December that he he files to the Justice Deent three days after dis- the matter with White counsel John W. Dean 3d.

Series of Meetings

ITT papers, which were disclosed over the weekend olumnist Jack Anderson, to a series of meetings beITT officials and former ey General John Mitchell, Commerce Secretaries Peterson and Maurice Stans hite House aides John Ehrn and Charles Colson, as s payments to the Texas irm of former Treasury ary John Connally.

chief target of the ITT ign was former Justice Deent anti-trust chief Richard en, who had filed a series i-trust actions against the merate, one of which would dissolved the merger with rd.

the case turned out, the Department finally agreed 's keeping control of Hartwhile divesting itself of other holdings. Mr. Mcwas made a federal judge. the contacts to which the anda allude were:

A thank-you letter to Vicent Agnew on Aug. 7, 1970, sistance in connection with ITT meetings with Mr. McLaren as well as with the attorney general at the time, Mr. Mitchell. The precise nature of Mr. Agnew's alleged intervention is not made clear.

● Reported assurances by Mr. Mitchell to ITT board chairman Harold S. Geneen that President Nixon was *not opposed* to the ITT-Hartford merger. Mr. Mitchell, in testimony to the Senate Judiciary Committee in April, said: "The President has never talked to me about any anti-trust case that was in the department."

● An ITT letter to the Treasury secretary at the time, Mr. Connally, in April, 1971, expressing appreciation for Mr. Peterson's willingness to see Mr. Geneen and voicing Mr. Geneen's belief that Mr. Peterson and Mr. Connally were "instrumental" in delaying the submission of the anti-trust case to the Supreme Court by Mr. McLaren.

Congress Probes

ITT is now the focus of investigations in both houses of Congress.

A Senate Foreign Relations subcommittee on multinational corporations today began a two-week series of hearings on alleged covert political activity by the conglomerate to block the election of Chilean President Salvador Allende and subsequently to promote economic collapse in the country.

As in the anti-trust case, there are a large number of documented contacts between ITT officials and top members of the Nixon administration in the Chilean case. Some congressional investigators are pursuing the theory that ITT pledges in 1972 of up to \$400,000 to finance the Republican National Convention that year were related to favorable administration action on both matters.

United Press International.

NO EARLY SPRING HERE—Icicles hang heavy on trees along Lake St. Clair shoreline in Tecumseh, Canada, a small city near Windsor, as recent floodwaters start to recede. Strong winds made conditions along shoreline the worst of the century, forcing some 3,000 residents to flee their homes. No deaths or injuries were reported.

News Analysis

Gray's Hopes for FBI Job Slim; Allies Seen Abandoning Him

By Sanford J. Ungar

WASHINGTON, March 30 (WP).—When L. Patrick Gray 3d formally was nominated to be director of the FBI a month ago, his chances for Senate confirmation seemed excellent and his nine months as acting head of the bureau were cited as his best qualification.

Today, as he returned for a new round of questioning by the Senate Judiciary Committee, his prospects were bleak indeed and his performance in the job may be his most difficult problem.

Mr. Gray's nomination has been submerged in a thicket of political and legal controversies —over the White House interpretation of "executive privilege," the quality of the FBI's investigation of the Watergate bugging affair and the question of congressional access to the bureau's "raw files."

Although the acting director himself has refused any contact with the press until the confirmation process is over, some of his close associates in the bureau are confident that he can survive the crisis. At worst, they insist, Mr. Gray, 56, will squeak through a vote on his merits in the Judiciary Committee and there will be a protracted fight over his nomination on the Senate floor.

But even Mr. Gray's allies outside the FBI—there are fewer of them than there were a month ago—consider that assessment foolishly optimistic.

Left Stranded

Administration sources favorable to the nominee say that the White House and the Justice Department virtually have abandoned him. What little lobbying there was on Mr. Gray's behalf was apparently suspended last week, after President Nixon made it clear he would not compromise on the issue of executive privilege.

The best Mr. Gray can hope for, say the sources, is that his appointment will be blocked in committee on procedural grounds and that he will be permitted to remain temporarily in J. Edgar Hoover's old seat until the Senate's special investigation of Watergate is completed a year from now.

As things stood before Mr. Gray's appearance, the Judiciary Committee was deadlocked 7 to 7, on his nomination, with two swing votes. Caught in the middle are Sens. John L. McClellan, D., Ark., and Charles McC. Mathias jr., R., Md.

Mr. Gray's supporters would need both these votes to report the nomination to the Senate floor, but his opponents require only one of them to block it with a tie vote.

Silent Lobby

The White House and Justice Department staffers who ordinarily "work" the Judiciary Committee and feed questions to sympathetic senators—as they did last year during the long hearings on the nomination of Richard G. Kleindienst as attorney general—have kept their distance throughout the hearings.

Officials at Justice explain that this was originally because Mr. Gray did not want their help, but that now key strategists are furious with the nominee. The White House, where Mr. Gray already had strong opponents, is angry, for example, over his offer to open the FBI's Watergate files to the entire Senate and over his disclosures during the hearings.

One senator attempted yesterday to take advantage of Mr. Gray's offer to review the files, but was told by one of the acting director's aides that it no longer stood, because of a presidential directive last week.

Some Justice Department officials already are suggesting that the only way for Mr. Gray to save his own face and that of the FBI will be for him to withdraw his name.

Gray Ordered Not to Answer Substantive Queries on Probe

(Continued from Page 1)

questions about Mr. Gray's relations with Presidential Counsel John W. Dean 3d in the Watergate probe.

Reflecting committee annoyance at the order to Mr. Gray, Sen. Tunney said Mr. Kleindienst's action "clearly demonstrates that the attorney general is concerned about revelations contained in the Watergate file. We have learned some things from information provided by Mr. Gray; the question is, 'How much more is there in those files?'"

Yesterday, two members of the Senate's select committee investigating the Watergate bugging sharply criticized an agreement with the Justice Department that put FBI files off limits to all senators but the chairman and ranking minority member.

That agreement is separate from the Kleindienst order to Mr. Gray to restrict information from the Judiciary Committee, which is considering the nomination as FBI director.

Sen. Lowell P. Weicker jr., R., Conn., called it "essential that all seven members of the committee had access" to the files and appealed the decision to Mr. Kleindienst. He was turned down.

'I Took the Order'

Mr. Gray already has testified for five and a half days and returned this morning for further questioning. He said of the instructions that he received from Mr. Kleindienst governing his cooperation with the committee, "I didn't question him at all—I took the order and that was it."

Initially, he had specifically offered access to the files to all members of both the select Watergate committee and the judiciary panel. This offer was modified last week after Mr. Nixon told a news conference that for the FBI to give a full committee of Congress raw files "and then to have them leak out to the press . . . could do innocent people a great deal of damage."

Disclosure of the new Kleindienst order came when Sen. Eastland asked Mr. Gray about an affidavit from a former employee of the Committee for the Re-election of the President, made public last week by Sen. Birch Bayh, D., Ind.

Private Testimony

The employee, Judith Hoback, sought to answer FBI questions about the Watergate affair without a representative of the re-election committee present, but was later confronted by campaign committee officials with the fact of her private FBI testimony.

Mr. Gray gave the judiciary panel dates of FBI interviews with Miss Hoback but refused to discuss the case further when Sen. Eastland asked: "How many times did she state that she had tried to hide the truth from the grand jury?"

The nominee answered that in compliance with his instructions he could not testify about a matter of substance, which that was.

Sen. Bayh learned yesterday of the restriction placed on access to the FBI files when he sought to examine the FBI report on its interview of Miss Hoback.

Today, he said that if she had led him "down the primrose path" with the affidavit she had given him, he wanted her summoned to testify. On Sen. Bayh's motion, the panel agreed to subpoena Miss Hoback.

Her affidavit suggested there had been a leak in the Justice Department about interviews with the FBI she considered to be confidential. She previously had testified before a grand jury investigating the Watergate bugging case.

Russia Lays Delay at Arms Talks to U.S.

GENEVA, March 20 (Reuters). —The Soviet Union said here today that the 25-nation Geneva disarmament conference is wasting time instead of negotiating and blamed the United States and its allies for the deadlock.

There was still no response from Washington to a draft convention for banning chemical weapons, introduced by the Soviet Union and other Communist countries a year ago, Alexei Roshchin, chief Soviet negotiator, complained.

This shows the United States and its allies are not ready to negotiate, and the cause is not technical difficulties but lack of appropriate political decisions, Mr. Roshchin said.

He described as "disappointing" a statement by U.S. negotiator Joseph Martin when the conference opened its spring session last month that work still remained to be done on complex tasks.

U.S. Response Awaited

"Further work on the question of the prohibition of chemical weapons depends on a response of the United States and other Western countries, formulated in the form of a draft convention. We share the regret that has been voiced by several delegations in the committee over lack of such a response," Mr. Roshchin said.

Western delegations have criticized the Communist draft as too generalized to be realistic and lacking adequate provisions for policing the accord.

Meanwhile, also in Geneva, United States and Soviet negotiators today held the 14th meeting in the new round of Strategic Arms Limitation Talks, SALT-2.

As usual, conference officials revealed only the length of the meeting—an hour and 40 minutes—and the date of the next one—Friday, March 23.

Vienna Talks

VIENNA, March 20 (UPI).— North Atlantic Treaty and Warsaw Pact negotiators met for the fourth time in 10 days today in an effort to move closer to a formal 19-nation plenary session on Central European troop cuts, Western diplomats said.

"The dialogues have proved useful, but it may be necessary to hold some more informal talks before we can stage a plenary meeting," a diplomat said. "It is still too early to speculate when such a session will take place."

2d Italian Is Arrested In Bombing at Trieste

TRIESTE, Italy, March 20 (Reuters).—Police said today they had arrested a second Italian in connection with a bomb attack on a crude oil terminal here last August for which the Palestinian Black September guerrilla organization has claimed responsibility.

The man, Pierluigi Manetti, 33, an art restorer, was arrested in Rome, police said. They added that he did not take part in the actual attack, in which explosives set three out of 35 storage tanks alight and damaged two others.

Police have already issued warrants for the arrest of two French women and two Algerians on charges of sabotaging the terminal and have arrested another Italian, Ludovico Codella, 28, also from Rome.

Gunman in Stockholm Fires at Parliament

STOCKHOLM, March 20 (AP). —A shot was fired at the Swedish parliament building yesterday, police reported today.

The bullet, apparently from a small-bore rifle, hit a window in a room where a law committee was discussing a controversial special law against terrorism in Sweden. The bullet did not penetrate the double-glass window.

Police found no trace of the gunman on the roof of a department store opposite the parliament building from which the shot was believed fired.

For Joint Mission in 1975

Soviet Space Center to Receive Americans

By John Noble Wilford

HOUSTON, March 20 (NYT).— Soviet space officials have agreed that, for the 1975 joint mission between U.S. and Soviet spacemen, American flight controllers will be allowed at the consoles of the Soviet control center "on the basis of technical necessity."

They will, however, probably not be permitted to visit such restricted areas as the Soviet launching site for manned missions, at Baikonur in Kazakhstan. No Americans, and few Westerners, have ever seen the lift-off of a Soviet spaceship.

This was disclosed here yesterday by Prof. Konstantin D. Bushuyev, Soviet technical director for the project, in which an American Apollo spacecraft and a Soviet Soyuz are to link up in earth orbit for the first joint mission by the two nations.

Prof. Bushuyev, a delegation of Soviet engineers and two cosmonauts, Maj. Gen. Vladimir A. Shatalov and Dr. Alexei F. Yeliseyev, are at the Johnson Space Center here to participate in the first round of negotiations for the mission.

At a news conference, Prof. Bushuyev and Glynn S. Lunney, the American technical director for the project, expressed satisfaction with the progress in working out the details of flight plans, training schedules, engineering tests and design of equipment.

U.S. and Soviet spacemen are to begin joint training here this summer and in the Soviet Union next autumn. Gen. Shatalov, who is chief of Soviet cosmonaut training, said the early training would involve "mutual acquaintance of the specialized terminology and of systems that will have to be worked jointly."

Mr. Lunney said the two nations had already exchanged "preliminary drawings" of their respective spacecraft so that each could build training mockups of the other's vehicle. This represents the first such exchange.

The 39-man Soviet delegation arrived here last Thursday and is expected to complete this phase of the negotiations by March 30.

According to American officials, the principal items on the agenda include planning joint training for crews and flight controllers, arrangements for communications between Soviet and American control centers, preliminary discussions of scientific experiments and detailed discussions of the flight "time lines"—the precise sequence of each step in the flight plan.

As planned now, the joint mission—officially known as the Apollo-Soyuz Test Project—will get under way on July 15, 1975.

Nixon Aide Says Food Price Rise Is Nearing End

WASHINGTON, March 20 (AP).—Herbert Stein, chairman of the President Nixon's Council of Economic Advisers, said today the increase in food prices is near its end.

Mr. Stein told a group of executives at a conference here that farm prices should be no higher at the end of this year than they were at the end of 1972. He said the reduction in such prices should "at last slow down markedly the rise in food prices at retail."

Conceding that the food price increase has come at an awkward time for the Nixon administration in its battle against inflation, Mr. Stein said the rise in food prices is coming to an end because the administration and the producers have acted to increase supplies.

He said he found encouraging a drop in the price of hogs and cattle. "It's a comfort to see something decline, if it's only for a day," Mr. Stein said.

Noting that the Cost of Living Council is releasing a statement soon on food prices, Mr. Stein said that the administration can now consider with assurance that food supplies are the "fundamental answer to the problem which has been bedeviling all of us."

Former Football Star Is Sentenced in U.S.

PHILADELPHIA, March 20 (AP).—Johnny Sample, a former professional football player, was sentenced to three years on probation and fined \$1,000 yesterday on charges of cashing stolen U.S. Treasury checks totaling \$7,400.

Sample, who starred as a defensive back with the New York Jets and the Baltimore Colts in the National Football League, was convicted last April after three bank tellers identified him as the man who cashed the stolen checks.

Expert Says Pentagon Papers Are Not Clear on Classification

By Martin Arnold

LOS ANGELES, March 20 (NYT).—An expert on the government's system of classifying documents told the jury in the Pentagon papers trial yesterday that he could not tell from looking at the papers whether or not they were classified.

The expert was a defense consultant and witness, William G. Florence, who had served 11 years in the Army and Air Force and another 21 years as an Air Force civilian employee—specializing all that time in the classification of secrets.

The implication of Mr. Florence's testimony was that if he, an expert, could not tell whether the papers were classified, how could Daniel Ellsberg, a nonexpert, tell? And if Mr. Ellsberg did not know they were classified, how could he be charged with espionage for disclosing them?

Mr. Florence gave this rather startling testimony despite the fact that the markings on the Pentagon papers say "top secret-sensitive" and each page in the volumes is also labeled "top secret." Further, the footnotes in the papers indicated that sources marked "top secret," "secret" and "confidential" were used to compile them.

'No Indication'

Still, Mr. Florence insisted that there was "no indication in the documents at all" to tell the source of their classification.

The Pentagon papers were classified, in part, apparently under a system of derivative classification—that is, the system under which a document is classified at the highest classification given to any of the underlying source material, even if that material consists of one sentence classified "top secret."

Derivative classification is only used by the Department of Defense, and it was not covered by Executive Order 10501, which was signed by President Dwight D. Eisenhower in 1954 and under which the Pentagon papers were classified.

The defense has been attempting to attack the entire classification system, but Judge William Matthew Byrne jr., who is presiding in Federal District Court, has said that he will not allow that challenge to be made before the jury.

Status in 1969

So Mr. Florence's testimony is, in a sense, a defense attempt to get around the judge's ruling. What Mr. Florence was trying to tell the jury was that he did not believe that in 1969—the year in which Mr. Ellsberg is accused of stealing the documents—the Pentagon papers were properly classified, despite their markings.

And the defense is attempting to show that, technically, there is no way of knowing whether the papers were ever properly classified without seeing the underlying source materials to determine whether they were properly classified.

McCloskey Gets Ambassadorial Post in Cyprus

WASHINGTON, March 20 (WP).—Robert J. McCloskey, for nearly a decade the spokesman of the State Department, has been named U.S. ambassador to Cyprus, officials in Nicosia have been informed.

A formal announcement of Mr. McCloskey's appointment is expected to be made by the White House in a few days.

Mr. McCloskey, 50, long has been considered for assignment to a variety of ambassadorial posts, after an exceptional career on the public firing line during many crises in American foreign policy.

While the credibility of government as a whole suffered heavy damage during this period, Mr. McCloskey's own reliability with newsmen remained intact. On several occasions, his job hung in the balance as he sought to maintain his reputation for straightforwardness with newsmen and meet superiors' demands for obfuscation.

The most celebrated rebound came in June, 1965, when Mr. McCloskey, himself a former marine, acknowledged that the first Marine units sent to South Vietnam were authorized to engage "in combat" if attacked. President Lyndon B. Johnson, determined to conceal the Marine combat role at that time, was furious and ordered a White House denial. Secretary of State Dean Rusk finally calmed down the presidential indignation.

Indian Minister Welcomes U.S. Aid Resumption

NEW DELHI, March 20 (NYT). —Finance Minister Y.B. Chavan said today that India would not be justified in refusing economic aid from the United States because of American arms aid to Pakistan.

The minister, speaking in Parliament, said that, despite the simultaneous lifting of an embargo on arms aid to Pakistan, India welcomed the U.S. decision to release a \$87.5-million loan suspended during the India-Pakistan war 15 months ago.

He asked the legislators, particularly Communists who have urged rejection of economic aid as a rebuff to President Nixon's Pakistan policy, not to "link up" the two issues.

Mr. Chavan said that economic aid was not a political matter. "It is the normal credit system," he said.

The Nixon administration, he said, had on its own initiative decided to freeze credit to India. "We did not care for it," he said. "We have not gone and asked for its resumption. If they have unfrozen it, well and good."

India, he said, would use the aid mainly for the purchase of fertilizers, industrial equipment and other goods needed for development.

ounded Knee Indians Ask S. to Hold Tribal Election

NDED KNEE, S.D., March 2).—Residents of the Pine Indian Reservation have ted a petition to the fedovernment asking that it an election on whether to e the present tribal consti- and select a new form of ment for the Oglala Sioux. ior Department spokesman furphy told a press brief- Pine Ridge yesterday that ition bore more than 1,400 res. He said it was being to determine whether uired 30 percent of the resn's qualified voters were for the election.

Murphy said it was not ately known how many are needed to have the ordered. He added that of about 30 days could ected before any election e arranged.

ell Means, a leader of the an Indian Movement, has ced he will be a candidate al chairman.

militant Indians who have olding the tiny reservation Wounded Knee the past have been demanding a lection to replace tribal an Richard Wilson.

has said the removal of lson was a condition for surrendering the village. etition, however, did not Mr. Wilson.

incidents were reported ay as Indian forces and arshals maintained secuadblocks at points leading e occupied village.

Means, at Wounded Knee, e next move in the conion is up to government tors.

e Department spokesman Webb said the governoffer last Sunday, which d a meeting with Indian and a disarming of the ion force at Wounded Knee, remained the principal basis for negotiations.

"We are trying for an agreement in principle," Mr. Webb said. "After that, details can be worked out. We are in contact with Wounded Knee people, and we are talking, but it is still too early to report any significant progress in the negotiations."

Mr. Means told a news conference at the Wounded Knee trading post that his forces were making a counterproposal that, in effect, would allow only an emissary of President Nixon to negotiate with them.

"Our recommended approach would foreclose an need for violent confrontations and for the tragic consequences of aggressive attack and necessary defense."

Poland Requests U.S. Extradition Of Former Nazi

NEW YORK, March 20 (UPI). —A deportation hearing against former Nazi camp guard Hermine Braunsteiner Ryan was adjourned today to allow federal officials time to consider a Polish request for her extradition.

A spokesman for the Department of Immigration and Naturalization said the hearing would resume April 24.

In Warsaw, the news agency PAP said Poland wanted to bring Mrs. Ryan to trial.

Mrs. Ryan, who is married to an American citizen, received U.S. citizenship in 1962, but it was revoked in 1971.

Poland alleges that Mrs. Ryan, who lives with her husband in the New York borough of Queens, was a guard at the Majdanek concentration camp in wartime Poland and helped select women and children to be sent to the gas chambers.

Second Autopsy In Whiting Case

GILA BEND, Ariz., March 20 (UPI). — Actress Sarah Miles's business manager died of a drug overdose, not a beating, a second autopsy has confirmed.

Los Angeles County Medical Examiner Thomas Noguchi confirmed that the body of David Whiting contained "lethal levels" of the sleeping pill methaqualone. Justice of the Peace Mulford Winsor 3d said yesterday.

Dr. Noguchi's report, agreeing with the findings of the Maricopa County medical examiner, will be the last evidence submitted tomorrow to a coroner's jury conducting an inquest into the death of Mr. Whiting, Mr. Winsor said.

The Irish Intangibles

The White Paper on Northern Ireland contains many eminently reasonable proposals. It would go as far as laws can go to guarantee Ulster Catholics their civil rights and representation in the proposed new governing body. It keeps that control in White hall which seems necessary, at least during a transitional period away from the present disorders. It maintains the union under the crown which the Unionists demand, yet recognizes the common destiny of all Ireland by a suggested conference with the South.

But to what extent can reason prevail in the current atmosphere of bitter divisiveness? To what extent do "those small but dangerous minorities, which would seek to impose their views by violence and coercion," to which the White Paper reprovingly alludes actually represent substantial segments of Ulster opinion? There are a good many Catholics—to use the most convenient label—who want immediate union with the Irish Republic. And there are many Protestants who would presumably settle for nothing less that the revival of the old Stormont government; some, in fact, who have spoken of fracturing the United Kingdom to give the Ulstermen the chance to fight things out without any British interference.

To none of these will the White Paper be acceptable: it is essentially a compromise. In the best British tradition, and, in the Irish tradition, many of the combatants in Ulster oppose any compromise. The "small but dangerous minorities" have demonstrated their ability to cause confusion and death, and to lure support away from those moderate positions. They can be counted on to continue their efforts in that direction.

The first major question is to what extent is the majority of the population in ravaged Ulster weary of this fatal dissension, and ready to turn from those who promote it to some stable, rational scheme of government? And if that should be answered positively and constructively, can the new machinery be made to work? Laws alone do not give civil rights—as black Americans can testify. The laws must not only be enforced at every level, but must be given that special vitality that can only come from a broad acceptance of their principles

Consequently, no one can say with any confidence that the White Paper will not join those other scraps of paper that litter history with vain hopes and good intentions falsified in fact. What can be said to the credit of the British government is that it has made an honest effort to meet Irish realities. Success or failure must rest with the Irish themselves.

Vorster's Witch Hunt

South Africa's white minority government has launched a new drive to silence its critics under a law that would be oppressive even by totalitarian standards. Sixteen student leaders have been "banned"—eight from the white National Union of South African Students and eight from the black South African Students' Organization.

The sixteen thus are confined to their residential districts and barred for the next five years from meetings of any kind, from publishing any writings, from attending or even visiting educational institutions, and from communicating with each other. No formal charges were filed against the students, they were never indicted or brought to trial. They were "banned" under the draconian Suppression of Communism Act, which provides no appeal and no legal recourse of any kind.

"Urgent action" against the students had been recommended by a parliamentary commission set up a year ago by Prime Minister Vorster. The commission has not yet finished its witch hunt and plans to probe activities of the ecumenical Christian Institute and the Institute of Race Relations. Christian Institute leaders have announced they will risk fines and imprisonment by refusing to cooperate with the commission whose operation they regard as a denial of democratic process.

Mr. Vorster is out to destroy these organizations for one reason: their attacks on the vicissitudes of apartheid have become increasingly effective—with whites as well as blacks, with both Afrikaner and English-speaking students, with business and professional people and even with white trade unionists.

Mr. Vorster's order is the action of a frightened man. But he will be even more frightened if the 3,000 people who turned out in Johannesburg last week to protest the ban succeed in their aim of organizing a nationwide movement not only to defend the students but to work for repeal of the laws that have turned South Africa into a police state.

THE NEW YORK TIMES.

University of Palestine

The establishment of a Palestinian Arab university on the Jordan West Bank is an important step toward channeling Palestinian national aspirations into more constructive pursuits than the bitterness and terrorism which have preoccupied them for so long.

The West Bank notables who seem finally to have overcome their regional and familial rivalries on the issue have had an uphill battle to gain recognition from both Israelis and Arabs outside the occupied territories. Many in the Israeli government feared that the proposed university would become a hotbed of student militancy that could pose security threats to the military occupation administration. The opposite fear confronted the local sponsors from Palestinian militants in neighboring countries, suspicion that the university would turn into an Israeli puppet institution.

In authorizing the project, the Israeli government naturally insisted that the course of study exclude incitement against Israel or the Jewish people, an unfortunate theme of much Arab study elsewhere. Otherwise Israeli authorities will stay properly aloof. Israel will provide no financial support, and the university's organizing committe believe they will gain adequate funding and academic cooperation from the Arab world and private international groups.

The paucity of opportunities for higher education among residents of the West Bank and Gaza has been one of the most distressing long-term inhibitions against realization of Palestinian national pride and identity. For too long, concerned citizens and governments in the West have tended to regard the proud Palestinians as wards of the international community, deserving only of refugee relief. The West Bank university now gives promise of becoming a focal point for an emerging Palestinian social infrastructure motivated by future development rather than past bitterness.

THE NEW YORK TIMES.

International Opinion

Concepts of Nonalignment

Indonesia is one of the leading countries in the nonaligned movement. We also think that concepts of nonalignment need modification because the world constellation that gave birth to the concept has also changed. Indonesia and Yugoslavia once had a close relationship. Now the relations are correct, but they are not as close as in the past. This was also shown by the fact that Premier Dzemal Bijedic of Yugoslavia did not stop over in Indonesia during his current visit to Indonesia's neighbors.

—*From the Daily Kompas (Jakarta).*

China's Path

It is clear he (Chou En-lai) has given top priority to getting China back into some sort of harmony with most of the rest of the world.

The American connection is interesting only because Washington was once so scornfully vilified as the arch demon of capitalism.

The fact is that China needs the capital goods, know-how and expertise of the United States just as it needs a friendly counterweight to Russia and Japan.

If its choice of counterweight is strange, it is seeking reinsurance by improving its ties with Europe and Britain. Hence the British exhibition in Peking; hence recognition of Madrid, hence Mr. [CIA agent John] Downey's freedom.

—*From the South China Morning Post (Hong Kong).*

In the International Edition

Seventy-Five Years Ago

March 21, 1898

PARIS—Delaperriere was his name, and politics turned his brain. He was seen on Saturday to climb a statue from which he unfurled a red banner and proceeded to address the crowd. "I am the humanitarian candidate," he cried. "If you wish to be happy, suppress the President of the Republic, the ministers, the magistrates and the soldiers. Appoint me Deputy and I'll divide my salary among you." Then the police arrived and took him to the asylum.

Fifty Years Ago

March 21, 1923

BALBOA, Panama—Three first-line battleships were disabled and 19 destroyers were sunk, theoretically, during major engagement maneuvers off the Pacific entrance to the Panama Canal, when the combined American fleet went into action in battle conditions. After the fight was over the experts agreed that the results proved the lack of light cruisers, the effectiveness of destroyers and the role of aircraft in future engagements.

'There Goes the ENTIRE Neighborhood'

Monuments of Failure

By C. L. Sulzberger

DENPASAR, Indonesia.—Russia's costly policy of seeking to purchase dominance in key strategic countries has been just as miserable a failure here in Indonesia, the world's fifth-largest nation, as it seems to have been in Egypt where armaments didn't manage to buy lasting political power.

This sprawling archipelago, containing 135 million people and controlling the East-West straits linking Japan to the Indian Ocean and the north-south straits that lead from Asia to Australia, is studded with rusting monuments to Moscow's enormously expensive and quite unsuccessful effort.

The net result has been vastly diminished Soviet influence here. Indonesian friendship with and dependence on the United States have grown. The local Communist party is shattered and the pro-Soviet faction has been driven just as far underground as its pro-Chinese counterpart.

Moreover, diplomatically, while Indonesia proclaims nonalignment and opposition to power blocs, its only major diplomatic commitment is to ASEAN (the Association of Southeast Asian Nations), all of whose other members have specific military arrangements with the West.

Since Sukarno

Since the decline and fall of Sukarno, Indonesia's flamboyant founding father, and frustration of a Communist take-over effort, the army has been at the helm. Its principal commanders graduated from higher American military schools and many intellectuals grouped around them to handle technical matters were educated in the United States.

The result has been a return to market economy concepts and a policy that doesn't in the least conform with Moscow's earlier hopes. Although the Kremlin now endorses a less gaudy program overseas than that launched by Khrushchev, it dislikes ASEAN and has on occasion criticized this regime as headed by "reactionary forces intent on restoring the old relations with the imperialist powers."

But even the tentative probes to ascertain Indonesian interest in the Brezhnev Doctrine, designed to encircle China through South and Southeast Asia, have been rebuffed. President Suharto told me: "We are automatically against such a conception as the Brezhnev Doctrine."

Other government officials complain the Russians "don't understand the Asian mentality." This surely does not apply to the talented diplomatic mission Moscow maintains in this country but switches in Soviet policy have been awkwardly expressed.

$1.5 Billion Invested

By the end of 1966, when the Soviet Union halted its Indonesian aid after the wholesale massacre of Communists here, the entire investment of the Soviet Union and its faithful satellites amounted to more than $1.5 billion.

When other foreign creditors agreed to reschedule Indonesian debt payments, Moscow refused to participate. Subsequently, special deferred rates were agreed on but trade levels have declined. Resentment was occasioned by relative lack of generosity in terms offered by the Russians as well as reluctance to supply spare parts for weapons.

The original Khrushchev aid program included a Polish aircraft factory at Bandung which folded after making six small planes; a Polish sugar refinery at Atjeh, Sumatra, which failed two days after opening; a Soviet steel mill at Tjillgon, Java, which didn't produce but is now being tentatively restarted with Western funds; a Soviet phosphate plant at Tjilitjap, Java, which failed; a Soviet marine biology laboratory at Ambon, stopped after partial construction; a Soviet nuclear reactor at Bandung that was never fueled; a Soviet highway across Kalimantan, which has been washed out. The only operable major project is a huge Jakarta sports complex.

The biggest share of Soviet help came in arms. Russia sent Sukarno a formidable array of weapons including 47 naval vessels, more than 100 aircraft, at least three SAM batteries equipped with guided missiles, helicopters, tanks, artillery and munitions. For lack of spare parts, this impressive arsenal has largely rusted away.

Major warships received included 10 submarines, four cruisers, seven destroyer escorts, 14 patrol craft and 12 Komar missile boats. Less than half are now operational—and only marginally so. All the submarines and cruisers are gone. Under a deal with a Taiwan firm, which can handle a maximum of 12 vessels annually, the ships are being towed to Hong Kong and sold for scrap.

A maximum of 20 Russian aircraft, not including any bombers or MiG-21s are still flying. The wreckage of the Soviet military investment here may not be comparable to the disaster in Egypt, which ended up in twisted heaps on the Sinai desert or in heavy reshipments back to the Soviet Union last year. Nevertheless, in terms of what might be called a massive investment in neo-imperialism, Marxist style, the monuments of failure are impressive.

Nixon Outflanked

By Joseph Kraft

WASHINGTON.—Col. Sanders never licked his fingers with more gusto than the Nixon administration showed when it entered its present battle against the Democratic Congress. The President rightly figured the public was solidly behind his crusade against big spending and centralized bureaucracy.

Democratic liberals seemed certain to go down as they defended the programs of the Great Society and the New Frontier. It was a collision, as Pat Buchanan of the White House staff wrote with zest, between "Congress and President, the nation's regnant ideology on the one hand and the nation's political majority on the other." Only it hasn't happened that way at all. Ted Kennedy and Fritz Mondale and the other Democratic liberals have been relatively quiet about social programs. Instead the backwoodsmen of the Democratic party have come forward with issues that outflank the administration on the right.

Sen. Sam Ervin of North Carolina, the constitutional fundamentalist and supreme foe of civil rights in the last decade, has emerged as the star of the Senate. He is chairman of the committee investigating the Watergate affair, and he is hammering home his inquiry in a way that truly threatens the administration.

Major Questions

Major questions have been raised about former Attorney General John Mitchell, former Secretary of Commerce Maurice Stans and the President's former appointments secretary, Dwight Chapin. Mr. Nixon has felt obliged to claim executive privilege to prevent the former White House aide from testifying before the Congress.

But that claim is almost certainly not going to avail with Sen. Ervin. In the past, executive privilege has always been used to safeguard confidential advice given to the President by his advisers. It has nothing to do with advice given by people who happen to be presidential assistants to lawbreakers and political saboteurs. So Sen. Ervin is sure to press the issue to the point of showing that the President has been abusing the Constitution.

A second star to emerge is Sen. Robert Byrd of West Virginia, the majority whip who has been known as a law-and-order man of such harshness that he took exception to the tributes paid to Martin Luther King jr. at the time of the assassination. Sen. Byrd has come forward as the leader of the opposition to Mr. Nixon's appointment of L. Patrick Gray 3d as the new FBI director.

The White House has been drawn into a second executive privilege issue, centering around the President's counsel, John Dean 3d, and the advice he gave to White House officials questioned by the FBI in connection with Watergate. Several key law-and-order senators on the Judiciary Committee, including John McClellan of Arkansas, seemed to have been impressed by the Byrd arguments. And confirmation of Gray is in doubt.

Then there is Sen. Henry Jackson of Washington, a supreme cold warrior who has spent much of the past decade in a long, drawn-out losing battle against arms control. Sen. Jackson is now winning a fight against part of President Nixon's program for détente with Russia.

To promote commerce with Moscow the President undertook to grant the Russians "most-favored-nation status" under the American trade laws. Sen. Jackson set up in opposition an amendment which would make most-favored-nation status to any country conditional on findings that there were no obstacles to free emigration. Since Russia has raised obstacles to would-be Jewish emigrants to Israel, the amendment applies to the Soviet Union.

The administration has been lobbying furiously against the Jackson amendment with liberal Democrats and Republicans. But last week when Sen. Jackson formally introduced the amendment, he had 75 senators as sponsors.

None of this, to be sure, is very elevated or enlightening. Political maneuvering is chiefly involved. But the lesson of what has happened is important.

The fact is that compromise remains the genius of American politics. If the President is prepared to compromise, he will find an accommodating spirit on the Democratic side. But when Mr. Nixon plays confrontation politics, then he gets in return the hard lumps he is now receiving.

Claire Sterling From Rome:

Over the last decade, avera strike losses have been 50 times higher than in West Germany and five tin higher than France...

ROME—Tourists who keep running into some strike or other whenever they visit Italy—which has hardly had a strikeless day in four years—may wonder why. So do many Italians. There is no simple explanation for the labor troubles that have brought this country's economy to a grinding halt. But judging from the new metal workers' agreement, one fact would appear to be an underlying death wish.

Italy's 1.5 million metal workers, who turn out everything from steel to finished automobiles, customarily set the pace for the rest of organized labor here. The last time they did that, in the hot autumn of 1969, a severe recession set in from which the nation has yet to recover. This time the pace could be even more killing.

The metal workers' settlement alone, a preliminary one covering only 230,000 workers in plants partly or wholly controlled by the state, was reached after months of negotiation and a loss of about 200 million man-hours in strikes: 10 times more than West Germany has lost altogether through strikes in the last 12 years. It includes very nearly everything the unions asked for. The most spectacular provision is a 39-hour week for Italian steelworkers, the first in the world to have crashed through a 40-hour ceiling still accepted even by the mighty steelworkers' union in the United States. This demand was put forward in special consideration of the arduous labor in steel plants, but union leaders have already hailed it as a portentous precedent for the entire working-class.

Labor Costs Up

Other provisions further restrict already severely limited overtime, integrate blue with white-collar wage scales, and provide across-the-board wage increases, more holidays, paid leave for study and other benefits increasing labor costs from 22 percent to 30 percent over the next three years. Since a package increase of 22 percent in 1969 turned out to be 45 percent when local union negotiators took up where their national counterparts left off, it is reasonable to suppose that the same thing will happen again.

Assuming that more or less the same contract will be imposed on some 8,000 small, medium and large private metal-working firms—and renewed promises of still more strikes to come seem to make that inevitable—this will mean that labor costs in Italy's basic metal-working industries will have almost doubled in just six years, once again setting the pace for all industry.

These arrangements have been accepted by negotiators representing what is perhaps Italy's weakest government in a decade (which is saying a lot), in the fourth year of the nation's worst recession since the war, at a time when its growth and investment rates are the lowest and inflation rate the highest in Western Europe, major plants are working below 80 percent of capacity, over a million workers are unemployed and, largely because of unending labor unrest and close-to-zero profits, the capital fleeing to safer havens abroad amounted to nearly $5 billion last year.

All this notwithstanding, Italian labor leaders argue that industry here can stand these higher costs, partly because costs are rising everywhere else in the world, and partly because it just can. If they were to assure unbroken labor peace and increased productivity over the next three years, they could conceivably be right. But that is certainly not what happened after the 1969 contracts were signed, nor are the portents much better this time.

After losing 302 million man-hours in strikes during the 1969 hot autumn, Italy lost another 146 million in 1970, 103 million in 1971 and 106 million in 1972 (before the metal workers really got going). Over the last decade, in fact, average strike losses here have been 50 times higher than in West Germany and five times higher than in France, even counting those two paralytic months of the Paris May 1968.

Far from going up since the stunning union victories of 1969, furthermore, productivity has tended to go down. One reason, apart from all-out strikes, has been a system of "hiccup" [illegible] closing down a single depar for a few hours, but in knocking out the whole pr tion line for much longer. Ab and worse reason has bee senteeism, shooting up to 2 cent and 30 percent sinc 1968 workers' statute guar paid sick leave with no rig company medical inspectio chanted with this singular warding way of punishin bosses, extreme left-wing potere operaio and lotta co have loudly congratulate workers for thus achieving hour week," cheering them get "sick" on more Friday Mondays so as to trim the week down still furth 20 hours.

Considering how underpa put upon Italian workers t be (as, indeed, many still their enjoyment of new power is understandable. B doesn't necessarily make i Privately, most labor leade realize how close Italian t have come to defeating the ends of late, by demandin and more while working l less.

One conspicuous result h that industries in both t vate and public sectors amortize their investme quickly as planned, shar ducing the capital availa new investment. The har victim is obviously the d south, precisely the area workers' demands for h vestment have generated nationwide general strike 1969 and are about to another.

On top of that, galloppi inflation has been eat higher wages almost as they are granted. The c tive edge has been cut off exports leading fatally t valued lira and costlier and layoffs and shutdown evoking the nightmare s early postwar days, whi had a seemingly permane of a million unemployed. does the Italian miracle 1950s seem light years a under these circumstan the economy is no longer of even creating jobs for ing population. At thi Italy is the only develope in Europe with fewer pe tually at work today than ago: a million and a ha while the population ha by four million in the me Relatively speaking, its lal has been shrinking so that one-third of the po now supports the oth thirds: The lowest such tion of any industrialize on earth.

Common Strate

It has been clear for so that all three labor fed (Communist-Socialist CG cial Democratic UIL, CISL), operating with a strategy since 1969, have the need for a certain n But, caught between "extra-parliamentary" fri to the Communists' left succession of extraordinar governments in Rome, the hardly dare to impose a any Italian government, past decade been capa placating the workers wit overdue social reforms; forcing them to face th facts of economic life, that surely not be in its pres

S. Bars Haven for 2 Cubans; ...ey Flee, Then Surrender

By Bernard Gwertzman

...SHINGTON, March 20 ...).—Citing the "spirit" of the ... Cuban-American anti-...ing agreement, the United ... has refused to grant safe ... to two Cuban fishermen ...ad briefly seized control of ... *nine-man fishing boat* at ...

...n a bizarre twist, the men, while being transport-...ck to Cuba, jumped over-... Sunday night off Key West, ... and were reported later by ... exile groups to be hiding ...rida.

...e *two Cubans*, who have ...ts in Miami, surrendered ... to U.S. authorities today, ...ssociated Press reported. In ...ington, the State Depart- ...said they had been charged ... illegal entry and deporta- ...roceedings had been start-...

...State Department spokes- ... said that although last ...'s agreement with Cuba on ...ting hijacking did not seem ... this case exactly, the United ... decided that the *actions* ...e fishermen violated the ..." of the agreement and ...t impossible for them to be ...d asylum here.

... related by State Depart- ... officials, the two men, Os- ...Hernandez Perez and Heri- ... Caridad Perez Martinez, *in their 20s, took control of* ...oat, the Gayo Largo 96, on ... 8, and at pistol point lock- ... captain and the other crew ...ers in the hold.

... two then tried to sail the ...o Isla Mujerez, a Mexican ... but lost their bearings, ...inally gave up the effort. ... *officials said the two men* ...eleased the rest of the crew, ...hen the captain tried to re- ...o Cuba, he ran out of fuel ...sked for U.S. Coast Guard ...ome 35 miles off the coast ...rt Myers, Fla.

The boat was towed into Key West by the Coast Guard on March 12. While the boat was undergoing minor repairs, the two fishermen told the Coast Guard of their desire to remain in the United States, and this was relayed to the State Department.

In Washington, officials at the State Department decided that since the two fishermen were seeking to hijack the boat to Mexico, the agreement did not strictly apply to the case.

But at what was described as "a high government level," it was decided that granting them safe haven here would violate the "spirit" of the agreement, and moreover would contradict the strong American effort to combat hijacking.

The officials said that the two, when advised of the decision, dropped their request to stay in the United States and "peacefully" agreed to return to Cuba with the rest of the Cayo Largo crew.

Boat Returns to Cuba

Monday night when the boat was returning to Cuba and was one mile off Key West, the two fishermen jumped overboard. Coast Guard helicopters and cutters failed to find them and the Cayo Largo returned to Key West from where it set sail yesterday morning without the two, the State Department said.

The latest development seemed to embarras the administration, which was trying to adhere to the hijacking agreement without making a major issue out of the case.

Under the anti-hijacking agreement signed in Washington and in Havana on Feb. 15, the two countries are obliged either to extradite or to seek "severe punishment" in their own courts of any hijackers who commit "acts of violence" on planes or boats that travel from one country to the other.

...mplona's Archbishop Bars ...ial of 11 Priests for Sermons

By Henry Giniger

...ORID, March 20 (NYT).— ...atholic Archbishop of Pam- ... has invoked the church's ...l privileges in Spain to pro- ...11 priests of his diocese ...t legal proceedings for ... delivered some of the ...est public attacks in recent ... on Spain's political regime.

... action of the Most Rev. ... Mendez Asensio and recent ...nts involving the church in Bilbao has revealed a state of deep hostility between the hierarchy in the northern Basque country and the Spanish government.

The Spanish hierarchy as a whole recently issued a declaration calling for the independence of church and state and the dissociation of church doctrine from that of the present authoritarian regime. The bishops called in particular for revision of the concordat between Spain and the Vatican. Among the privileges it confers is one that protects priests against prosecution except with the consent of their bishops.

Paradoxically, it was this privilege that Bishop Mendez invoked to reject prosecution of seven priests who gave sermons last month that justified to some extent the kidnapping in January of Felipe Huarte, one of Spain's most prominent industrialists, by a group of Basque terrorists.

4 Other Priests

Four priests who delivered similar sermons were given the choice between prison and fines in legal proceedings that did not involve a trial.

The priests having chosen prison, the bishop exercised his right to place them in a nearby monastery for three months.

The bishop said that while he favored revision of the concordat, which dates from 1953, when the church was an ally of Generalissimo Francisco Franco's regime, he was applying it fully in this case because "we firmly believe that allowing the prosecution of these 11 priests would gravely damage the peace of our Christian community."

U.K.-Polish Pact Signed

LONDON, March 20 (Reuters).—Poland and Britain tonight signed a 10-year agreement on greater cooperation in the economic, industrial, scientific and technological fields. The agreement was signed by Tadeusz Olechowski, Polish foreign trade minister, and Julian Amery, British deputy foreign minister.

Controversy Flares in Britain

Long Jail Terms for Teen-Age Muggers

LONDON, March 20 (AP).—Controversy flared in Britain today over sentences totaling 40 years passed on three teen-agers for mugging. Police and some lawmakers welcomed the punishment, but social workers expressed alarm.

Larry Grant, legal officer of the National Council for Civil Liberties, said the sentences were "incredible."

"If we send 16-year-old boys to jail for 20 years, we will end up with 50-year sentences," Mr. Grant said. "What good have life and 99-year sentences achieved in America?"

Mr. Grant was commenting on the case of Paul Storey, 16-year-old son of a West Indian father and English mother, ordered detained for 20 years by Birmingham Crown Court yesterday.

Storey pleaded guilty to a charge of attempted murder of 31-year-old construction worker Robert Keenan. The court was told Storey hit Mr. Keenan with a brick and robbed him of 30 pence, five cigarettes and a bunch of keys.

Sentenced to 10 years each were Storey's 15-year-old friends Mustafa Fust and James Dulgnan. The three will be eligible for parole after serving a third of their terms.

Ted Ward, London organizer of PROP, an association representing persons serving jail sentences, said, "Mugging is a deplorable crime, but how can anyone justify sentencing a boy of this age to 20 years?

"In my experience prisons are breeding grounds for violence, and if boys of this age are locked up for 20 years, God help society when they get out."

Storey's mother, Mrs. Ethel Sanders, blamed the tough Handsworth district of Birmingham for causing juvenile delinquency.

"Paul went to work as a laborer when he left school," she said. "But he had been unemployed and had got into the habit of staying in bed in the morning and mixing with other youths."

Birmingham police welcomed the sentences.

"If this doesn't frighten them, nothing will," a spokesman said.

Charles Simeons, a Conservative member of the House of Commons, said every city should have a central area where persons charged with mugging should be kept until their trial.

"This compound would be erected for people believed to have been associated in crimes of violence," Mr. Simeons said. "For a start it would deter people."

Political sources said the controversy over the sentences may spread to Parliament. The sources said most of the parliamentary criticism of the penalties will come from opposition Labor and Liberal lawmakers.

The three teen-agers are expected to serve their sentence in a special section of Aylesbury Prison northwest of London. The section has prisoners aged under 21 serving sentences up to life.

Truckless Autobahns

BONN, March 20 (UPI).—West Germany intends to ban truck traffic from its autobahns on 11 weekends this summer to make room for vacation traffic, the government said today.

San Marino Ends Crisis

SAN MARINO, March 20 (Reuters).—The world's smallest republic, San Marino, today solved its worst political crisis in 15 years and formed a government. It has been without one for two months.

The crisis in the republic, a 23-square-mile enclave near Rimini, in central Italy, began on Jan. 22, when the State Congress (cabinet) resigned over plans to solve economic troubles. It was made up of Christian Democrats and Social Democrats.

Today the Christian Democrats announced they have formed an alliance with the Socialists and a splinter party and dropped the Social Democrats as partners.

The republic, which has a population of 20,000, has a history dating to the fourth century.

Uruguay Names Tupamaro Killer Of American

MONTEVIDEO, Uruguay, March 20 (AP).—Military authorities have named a Spanish-born leader of the Tupamaro terrorists as the man who shot American police expert Dan Mitrione in August, 1970.

Mr. Mitrione, an employee of the U.S. Agency for International Development and an adviser to Uruguay's police, was kidnapped July 31, 1970, by the Tupamaros and killed Aug. 10, 1970.

A military report issued last night said Antonio Mas Mas, of Spain, was the actual murderer of Mr. Mitrione, who was the first victim of the Tupamaro terrorist campaign.

Mas Mas was imprisoned recently by military authorities on charges of homicide, falsification of public documents, and kidnapping.

It was not disclosed when Mas Mas arrived in Uruguay from Spain.

OPERA IN PARIS

Berlin State Opera Opens 3-Week Stand

By David Stevens

PARIS, March 20 (IHT).—Famine is rapidly turning to feast in opera-starved Paris. Last night, at the Théâtre des Champs-Elysées, the Berlin State Opera began a three-week stand that will overlap with the much-awaited reopening of the Paris Opéra. The genuine enthusiasm that greeted the opening performance of Wagner's "The Flying Dutchman" surely had something to do with this state of affairs—although the very solid quality of the production was justification enough.

Tours of this sort surely have their value, quite aside from the cultural politics involved—and it is not irrelevant to remember here that the Berlin State Opera is from the tradition-laden house on Unter den Linden in East Berlin. Even if many of the leading singers (like Theo Adam and Peter Schreier last night) can be heard anywhere on the star-singer jet circuit, the company still brings its orchestra, chorus and style, and puts its best foot forward in a way that does not often happen at home.

But, to get one complaint out of the way now, the five operas in the tour program, besides the "Dutchman," are "Die Walküre," Mozart's "Cosi Fan Tutte" (seen at Versailles in 1970), Beethoven's "Fidelio" and Berg's "Wozzeck." An appropriately German repertory, and in the case of "Wozzeck," uniquely appropriate, since it was almost 50 years ago that it had its world premiere in this Berlin house. But in the balcony-foyer of the theater is an exhibit of photographs from the company's repertory that tempts one to ask why one of the operas shown here, rare or contemporary or both, could not have been included in the Paris repertory.

The answer is partly to be found in the economics of such enterprises (120 francs top price for all but "Cosi"), but "cultural exchange" surely means more than somebody else's production of Wagner or Beethoven.

Musical Base

Still, if all the performances are of the quality of last night's gala opening, there will not be many complaints. The solid musical base of the company was clear in the well balanced orchestra and in the alert and rich choral singing (directed by Siegfried Völkel). Heinz Fricke's conducting was marked by a subtle balance of musical forces rare in performances of this opera, although the concert version of the overture and the clear division into separate acts emphasizes the opera's non-Wagnerian models.

Erhard Fischer's staging and Wilfried Werz's designs also had a solidly traditional basis, but with some striking touches of originality and realistic effect.

The realism of the opening storm scene suggested that the Berlin State Opera is not unmindful of the standards at Walter Felsenstein's Komische Oper a few streets away. The Scandinavian modern decor of Daland's house seemed an anachronism until Daland himself returned dressed like a banker—apparently drunken old seadogs are not the only ones to sell their daughters. Even Siegfried Vogel's smooth baritonal timbre seemed to suit this approach, although one missed Daland's low notes.

In the final scene, the Dutchman's final declarations, made from a rising gangplank, were theatrically effective, but the fact that he was allowed to see and hear all of the final Senta-Erik dialogue before storming off in a huff made nonsense of the situation. Finally, no apotheosis, but merely the crowd on shore gazing in horror and wonder at the Dutchman's presumed redemption by Senta's suicide.

Theo Adam is a known quality. Suffice it to say that, once past a certain tentativeness in the opening monologue, he excelled himself in vocal richness and dramatic intensity, carrying the brunt of the performance on his considerable shoulders. Eva-Maria Straussova was a touching Senta, although the whiteness of her voice kept her from realizing the part's most exalting passages. Martin Ritzman was a very Teutonic Erik and Gertraud Prenzlow an effective Mary, while Peter Schreier made about three times as much of the Steersman's role as anyone can reasonably expect.

Agence France-Presse.

Theo Adam, Eva-Maria Straussova in "Flying Dutchman."

ON THE ARTS AGENDA

To commemorate the 150th anniversary of Joseph Nicéphore Niepce's key discoveries in the field of photography, the French Cultural Ministry is mounting an exhibition entitled "150 Years of Paris in Photography," opening April 3 at the Cite Internationale des Arts in Paris.

Around the Swiss Art Galleries

Zurich

Gianfredo Camesi, Galerie Renée Ziegler, 33 Rämistrasse, Zurich, to March 31.

Camesi, 33, pays homage to his native Menzonio in the canton of Ticino in 400 drawings and objects done in the last two years. One might make a parallel with Cézanne and his many trips to Mont Sainte-Victoire. With daily diary-like method Camesi has synthesized Val d'Maggio images in dark, richly textured black and white graphite rubbings. He has captured the vaporous grays of Menzonio's shifting mists and moods. In a reverse from his conceptual Milanese stance, Camesi with his on-the-spot drawings surpasses academic cleverness and re-creates an elegance only to be found in nature.

* * *

Jürgen Brodwolf, Gimpel and Hanover Galerie, 35 Claridenstrasse, Zurich, to March 24.

Zurich-born Brodwolf has an imaginative sense of situation. He decapitates paint tubes, empties them and presses them into suggestive human form. Large sheets of leading are crushed in the same way. In both cases, the results are monumental in feeling. He uses studio motifs for small framed objects, which evoke tiny confessional boxes. Tube figures are hung from the painter's brush on half finished oils. A green pencil pierces a seated victim nailed to a child's red blackboard. An old medicine cabinet has four dejected prisoners.

Simple but effective is agonal magic lantern con three slow-speed disc pl and mirrored walls. It viewed through eight conc convex peepholes to pe varied sequence of eight tions to pass, meet, part.

* * *

Marcello Morandini, Galer namarie Verne, 6 Obere Zurich, to March 28.

Marcello Morandini, 33, ter known in Northern than in his native Italy. Italian flair for visual gam logarithms appeal to the erner's passion for ord and manage to poke fun computer mentality at th time. —JOY DAVENI

PARIS NIGHTLIFE:

Régine as Headliner and Hostess

By Thomas Quinn Curtiss

PARIS, March 20 (IHT).—*Régine is a Parisian combination of Texas Guinan and Elsa Maxwell.* Her smart discothèque on the Boulevard Montparnasse—New Jimmy's—is the haunt of movie stars and Rothschilds, of Françoise Sagan and Gunther Sachs. Like her American counterparts of yesterday, Régine was not satisfied with her social success and has followed their example in taking to the stage. Determined on a theatrical career, she has sung in nightclubs, as an Olympia headliner and in Carnegie Hall. *Until April 1, she is* at the Bobino, displaying her talents both as a hostess and as an artist.

Her presence lights up the venerable music hall on the Rue de la Gaité like a Turkish battleship. Tout-Paris occupied the stalls at her premiere last week, making the occasion seem like New Year's Eve at her posh boite. *In this stage appearance, she is* mistress of ceremonies for a first-rate vaudeville revue and, at the evening's end, gives her own concert. With artful cunning, she slips into everyone else's act. She makes merry with the Ivanovitch gypsies who spike Romany melodies with rock; sambas with the ample Touka and her Brazilian companions to the Rio carnival band of Ben; and doubles as stooge/vamp for Claude Véga, the clever mimic. The sabre-wheeling Samourai battle for her handkerchief, and her pink boa, principal property of her signature song, becomes the main feature of Philippe Genty's delightful marionette show with its chorus line of rosy-feathered chicks.

Claude Véga's imitations—in particular his uncanny impersonation of Louis de Funès, a complete replica down to the last gesture and grimace—and the ingenious Genty puppets at play are the bill's top-drawer attractions. Régine's concluding solo interlude discloses her versatility. She is capable of a touching tenderness in melancholy laments and is also an able exponent of the brassy lowdown.

Régine, now appearing at the Bobino in Paris.

The Café-Théâtre de l'Odéon (3 Rue Monsieur-le-Prince) has a revue of genuine satirical sparkle in "J'Vais Craquer." It is restfully performed by a talented quartet of youngsters—Fabienne Barbey, Christian Claver, Gérard Gugnot and Thierry Lhermitte—under the direction of Vincent Kaldor whose "Paris 1900" spectacle at another café last summer is admiringly remembered. In a series of sharp sketches, foolish foibles are accorded a hilarious razzing. Listen to the geography *professor whose incipient racism* is unmasked as he lectures or the vulgar chat of tourists in a railroad carriage. You will perceive the fine subtlety of the art of the cabaret skit, the art from which sprang such diverse dramatists as Donnay, Wedekind and Brecht. In addition there are some moments of roaring slapstick fun such as that in which a bewigged entertainer tries to recite a proverb and, confused, can only splutter gibberish. The show (through May) is at 11:30 (except Sundays). A diverting hour awaits you.

Roger Grass's dinner-spectacle in the first-floor restaurant of the Eiffel Tower, after earlier excursions to Russia, Persia and Japan, has gone native for March with "La Tour en Fête." There is pleasant French dancing and song and that amazing clairvoyante, Veronica. Blindfolded on stage, she can guess at once the number of your passport, your name and from whence you hail, be it Seattle or the Fiji Islands. The menu has also gone native. Dinner is at 8:30 and curtain time is 9:30.

FASHION:

From 'Tango' to Balenciaga

By Hebe Dorsey

PARIS, March 20 (IHT).—"Last Tango in Paris" is having a fashion sequel. Shrewdly cashing in on all the publicity, Vicky Tiel is calling her new collection "New Tango in Paris" and will show it in the Salle Wagram—where Brando and Schneider danced the famous tango scene.

Models will dance with actor Jean-Pierre Cassel, Guy Marchand (Brigitte Bardot's partner in "Boulevard du Rhum") and the Salle Wagram habitués. Maria Schneider may turn up but no. not Brando.

Date of the show: April 1. 11:30 a.m. The buffet: Bread and butter.

* * *

Things have come a standstill between ready-to-wear firm Get Jaunet and the American conglomerate Borden Associates—whose deal to buy Get was practically signed last week and reportedly had the approval of the French Finance Ministry.

Get is one of the largest French sportswear houses, specializing in young-looking inexpensive clothes. The firm has four factories in Cholet, France, and one in Morocco. *Its turnover is around* 40 million francs. Borden's offer included 50 million francs and a five-year contract for current owner Gaston Jaunet, as director of the house.

But, "Mr. Jaunet called the whole thing off last Friday," a spokesman for Get said today. "when Borden's representatives tried to infringe on his directorial position and cut down his time from five to one year."

Mr. Jaunet, who is abroad, is said to be working out another, better contract.

If Get is sold, it will be the first clear-cut example of the French ready-to-wear industry luring foreign investment. Another French firm, Big Chief, came close to being sold to an American firm but the French finance minister refused to okay the deal. So far, the most common practice is licensing contracts. Christian Aujard, for example, has an exclusive manufacturing and distribution contract with Modellia, New York, for the United States.

According to Bruno du Roselle, president of the French ready-to-wear association, the British are getting into the game too, but so far they seem only interested in men's wear.

"This is a new investment trend," Mr. du Roselle said. It is partly due to the fact that both our money and our wage situations are sound."

* * *

A correction: The house of Dior did not close its Baby Dior boutique at 28 Avenue Montaigne, to open Dior Sports, as erroneously reported on March 15. Dior Sports is located between 28 and 30 Avenue Montaigne, in a former scarf and gloves boutique that Dior purchased for the new operation.

* * *

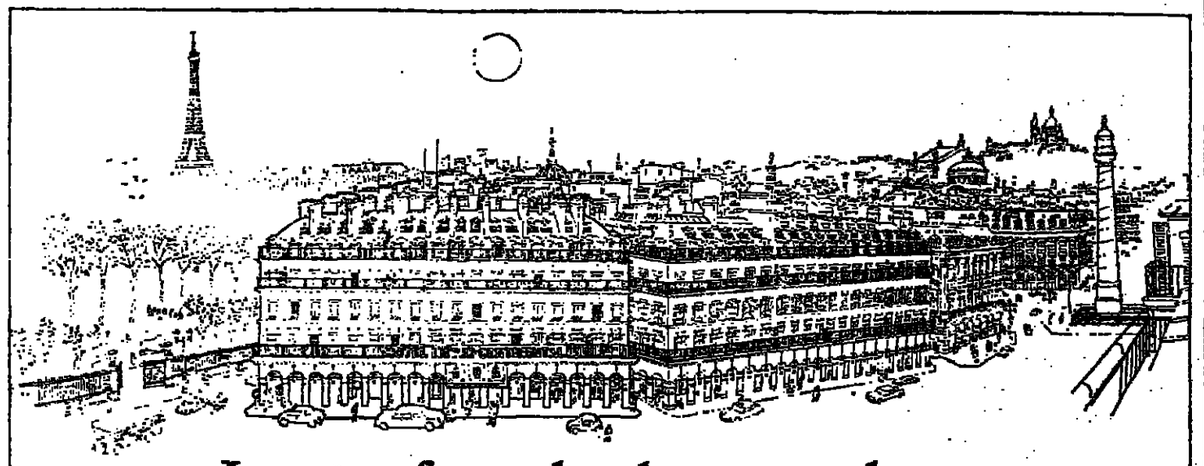

"The World of Balenciaga," a major exhibition honoring the late Spanish designer, will open in the Costume Institute of the Metropolitan Museum of Art in New York on Friday. This is the *first time the institute has done* a retrospective on a single designer and the first such Balenciaga show to be given anywhere.

A major postwar fashion influence, Balenciaga, who died in 1972 at the age of 77, won worldwide admiration. Even Chanel had kind words for him: "The others are draftsmen or copyists," she once said, "or else, they are inspired people or even geniuses, but Balenciaga alone is a couturier. He is the only one who can design, cut, put together and sew a suit or a dress entirely alone."

The show (to July 1) was put together by Diana Vreeland, ex-editor of American Vogue and now consultant to the Costume Institute. It consists of 150 Balenciaga originals, including his latest work: the wedding dress for Gen. Francisco Franco's granddaughter.

Prospective clients' inquiries welcomed.

In a city of great hotels, one stands out.
Look where it *is*, to begin with. Right in the center of everything. Place Vendôme, Concorde, Opéra, the Louvre, the Tuileries. Whether you come to Paris for business or pleasure or both, isn't this where you want to be? Instead of at the airport or out in the banlieu?
And then look at *what* it is. A superb hotel in the old grand manner, with rooms and service the way they used to be and ought to be. What you have a right to expect.
Come stay at the Hotel Inter-Continental in Paris. *You.* Overnight, or longer. And your company, for its salesmeetings or business luncheons.
Isn't it a blessing that the Inter-Continental is big enough and grand enough for you both?
The Magnificent Inter-Continental Paris. *3, rue de Castiglione.*

FINANCIAL NEWS AND NOTES

Rolls-Royce Motors Is for Sale

Rolls-Royce Motors Ltd., the car and diesel engine marketing unit separated from Rolls-Royce Ltd. after it plunged into bankruptcy in February, 1971, is being offered for sale by public tender. "We hope to produce a prospectus possibly later this week giving full details of the sale," an official of N.M. Rothschild, the London merchant bank handling the offer, reports. Last year Rolls-Royce Motors earned pre-tax profit equivalent to around $7.9 million, computed at the pound's current floating rate of $2.46, on sales of about $110 million. Some financial sources suggest bids up to $100 million might be received.

FTC Challenges GE, Chrysler Link

The U.S. Federal Trade Commission says it intends to issue a complaint challenging the legality of the membership by Edmund W. Littlefield on the boards of both Chrysler and General Electric. The agency claims the arrangement violates anti-trust laws since both companies compete in the residential and commercial air conditioner business. A section of the Clayton Anti-trust Act forbids interlocking directorships by two competing companies. A proposed consent agreement would require Mr. Littlefield to resign one of his posts and force both companies to report to the FTC on potential directors for five years.

Gulf & Western Unit Faces Suit

The Justice Department says it will file an anti-trust suit if a subsidiary of Gulf & Western Industries, Associates First Capital Corp., accepts shares of Talcott National Corp. pursuant to a tender offer. The anti-trust division says it is disturbed by the possibility of Associates Capital acquiring City Finance Co., a Talcott subsidiary. Divestiture of City Finance by Gulf & Western and Associates Capital would be an object of the suit if the sale goes through. The action also would seek a court order requiring the parties to preserve City Finance's separate status pending resolution of litigation and an injunction on specified "further acquisitions in the consumer finance field by Gulf & Western."

Opel Eyes Plant in Switzerland

Adam Opel, the West German subsidiary of General Motors, is contemplating shifting the assembly of its large cars, the Admiral and Diplomat line, to Switzerland. The project is in line with Opel's plan to create additional production capacity for its more popular smaller models at its main Russelsheim plant, where the Diplomats and Admirals are also built. A likely assembly site is General Motors Suisse at Biel, which builds some U.S. models of GM and some Opel Rekord-models.

Sté. Générale Sees Profit Increase

Sté. Générale de Belgique expects revenue from its securities portfolio, the main element in its net income, to be higher in 1973 than in 1972, reports Max Nokin, governor of the Belgian holding company. The other major component of net income, revenue from financial transactions, is expected to be affected by a reduction in the company's working capital—due to investments made—and uncertain business and monetary conditions. The securities portfolio had a market value of 13.4 billion Belgian francs in excess of its book value as of Monday, compared to the 12.5 billion franc excess reported on Dec. 31. The breakup value of a share increased to 4,350 francs from 4,195 francs. Mr. Nokin also reports that the company's investment policy is shifting to service-oriented companies and away from the traditional industrial sector.

Oil Funds Shake World Money Marts

Mideast, N. African Wealth Seen Threat

By Clyde H. Farnsworth

PARIS, March 20 (NYT).—A new force has arisen on the monetary scene—the power of oil money in North Africa and the Middle East.

After $2.7 billion flooded the West German foreign exchange markets March 1, forcing the closing of markets and triggering the most severe monetary crisis since the 1930s, a German monetary official said: "Our guess was that half the money that came in was from central banks, and half of that was from the Middle East."

The fact that Arab money forms a large part of the speculative dollars abroad has, in effect, been confirmed by the Arabs. After the devaluation of the dollar Feb. 12, a Kuwaiti government statement said that "precautions had been taken in anticipation of possible devaluation." Saudi Arabia and Libya said much the same thing.

Those "precautions" have shaken the monetary system—and promise to shake it further.

While most attention has focused on the multinational corporations as the wheelers and dealers in the currency crisis, the Arab sheikhs and rulers are starting to move in the same league. According to some estimates, they will soon pass the multinational corporations as the major monetary force in the world.

Biggest Hoard Ever

By the end of this decade, according to Horace C. Bailey, senior vice-president of Chemical Bank, Middle East governments will have as much as $175 billion in their treasuries, representing what is likely to be the largest hoard of foreign-held money ever accumulated.

Though what they hold now is far more modest, it still can pack a wallop. American bankers estimate that $15 billion of the $80 billion in the Eurodollar market is the money of central banks from smaller countries (the central banks from the major developed countries having agreed not to make Eurodollar placements). Of the $15 billion, it is estimated that half comes from the Middle East and North Africa.

The Middle Eastern governments also place their reserves in interest-bearing paper of other governments or public authorities and, of course, in gold.

At the end of 1971, according to figures in the latest annual report of the Bank for International Settlements, the Middle East governments held $10 billion of gold reserves. They probably hold far more now.

Dollar Drain

Mr. Bailey has forecast that the balance-of-payments drain resulting from the importation of crude oil for the United States by the end of the decade will be almost $21 billion a year, with Europe's annual outflow at $25 billion and Japan's almost $15 billion.

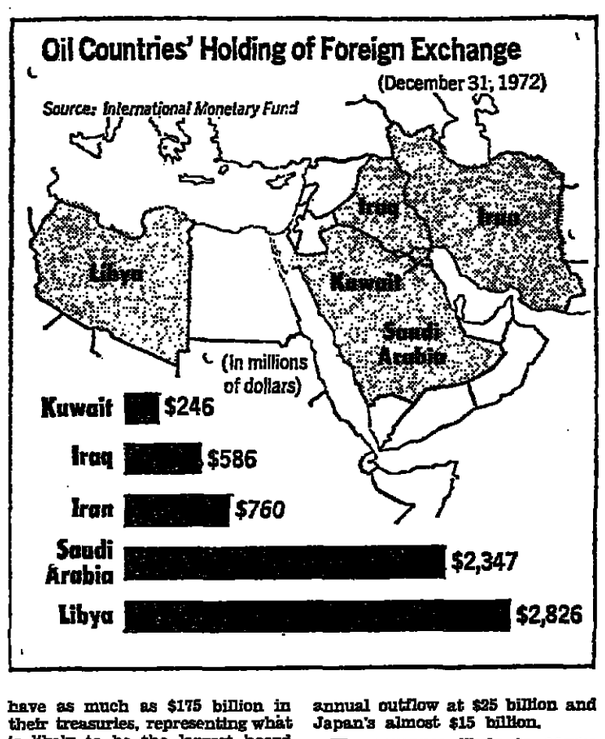

The revenues likely to accrue to the Middle East producing countries, he said, can be put at $30 billion to $40 billion annually, with Saudi Arabia accounting for perhaps half.

As a result of the latest dollar devaluation, the Middle Eastern countries are expected to increase their earnings by $750 million a year because of an escalator clause negotiated last year by oil companies and members of the Organization of Petroleum Exporting Countries.

The Organization for Economic Cooperation and Development presented a paper to a working group of monetary officials in Paris last month warning that the implications of this new oil wealth had to be considered in trying to plan a new monetary order for the decade.

One of the implications mentioned in the paper was that the vast oil wealth would keep the financial markets rocking.

An economist close to the subject said that this money would demand to be placed in tangible earning assets that did not depreciate. "You may wake up one day and find the Arabs bidding for Standard Oil," he said.

Big Board Prices Drift In Low-Volume Trade

By Terry Robards

NEW YORK, March 20 (NYT).—The stock market plodded through another gloomy session today as Wall Street awaited the outcome of the Nixon administration's latest confrontation with the commercial banking community over rising interest rates.

The Dow Jones industrial average was down nearly 5 during the noon hour, but managed to climb part of the way back and close with a minus reading of 2.63 at 949.43. Volume on the New York Stock Exchange edged up to 13.25 million shares from yesterday's 12.46 million, but remained sub-par.

Leading bankers attempted to justify the half-point prime rate increase initiated yesterday by Manufacturers Hanover Trust, but basically Wall Street appeared to be awaiting the outcome of Thursday's scheduled meeting between bank officials and Arthur F. Burns, chairman of the Federal Reserve Board and of the Committee on Interest and Dividends.

"Every investor with a memory recalls that rising money rates put bond prices and eventually stock pricees down," said Robert H. Stovall, chairman of the investment policy committee at Reynolds Securities.

"Timing is the only variable," he added. "This is one of the basic rules." He went on to say that he expected stock and bond prices to show short-term weakness, pending the resolution of the conflict between the banks and the administration.

Bank stocks generally were mixed although First National City fell 1 1/8 to 78 1/8 at the close, despite announcing plans to raise its quarterly dividend from 33 cents to 36 cents a share. Chase Manhattan slid 3/4 to 48 3/4 and Bank of New York dipped 5/8 to 36 1/2, while Bankers Trust moved up 1/2 to 59.

Stocks declined in light trading on the American Stock Exchange. The Amex index dropped 0.07 to 24.53, while declines outscored advances, 545 to 280. Turnover was 2.68 million shares, compared with 2.61 million yesterday.

AT&T Profit Soars by 20%

NEW YORK, March 20 (Reuters).—Net profit soared 20 percent at American Telephone & Telegraph in the first quarter ended Feb. 28, the giant utility reported today.

AT&T said its earnings were $678 million, up from $566 million in the same period a year earlier. Per-share earnings were $1.16, compared with 97 cents.

Revenues increased to $5.5 billion from the year-earlier $4.9 billion.

AT&T said it added 1,276,000 phones during the first quarter.

The company attributed its earnings increase to strong growth in line traffic and the effect of higher rates approved during the period.

N.Y. Exchange Forms International Division

NEW YORK, March 20 (Reuters).—The New York Stock Exchange has formed an international finance division that will work closely with the exchange's recently-formed committee on international capital markets, NYSE Chairman James Needham said today.

The purpose of the division, which will have its own legal and economic staff, will be to conduct research for the committee and aid member firms in foreign matters, in line with the NYSE's avowed interest in the internationalization of capital markets.

Quiet Trading Is Called Technical

Dollar Gains on Most European Markets

By Carl Gewirtz

PARIS, March 20 (IHT).—The dollar bobbed in very quiet trading on European foreign exchange markets today. After opening below yesterday's closing prices, it rallied on every market except in Paris and London.

Exchange dealers attributed little significance to the day's moves. "Technical factors—the demand for dollars needed for commercial business transactions that backed up during the two-week shutdown of official exchange markets—are still the dominating force," said a German trader.

The "quite natural" demand for dollars "will dominate the market for quite a while," he said. During that time the value of the dollar is expected to move within a fairly narrow range around present levels.

This may last several weeks. But many dealers expect the relative calm to give way to a test of the new arrangements put together in a series of international conferences last week. The question is whether the capitalist states will join together to support the present level of rates or whether they will tolerate some additional appreciation of the European currencies against the dollar.

The Bundesbank was again forced to intervene in the market today, selling Swedish kronor, Belgian francs and some Danish kroner to keep the value of the DM against these monies within the 2 1/4 percent band. The French franc was also within a fraction of the upper intervention point and the guilder was not far away. Sweden and Norway, while not members of the Common Market, have aligned their currencies with the six-nation EEC float.

Sweden, meanwhile, announced new measures to halt speculation and avert the need to upvalue the currency. Per Aasbrink, head of the central bank, said that foreign holdings of kronor will be limited to the average level held in January. If the foreign holdings are not brought down to the required level by March 26, the Swedish central bank reserved the right to take punitive measures against those concerned, he added.

Overall, there is still no sign that the vast holdings of European currencies built up in the speculation that led to the dollar crisis are being sold. "As long as (the money managers) are not convinced the troubles are over, they can continue to sit on their holdings," a Frankfurt banker said.

The closing dollar rate in Frankfurt was 2.828 DM, up from yesterday's 2.8275. In Amsterdam, it was 2.8915 guilders, up from 2.8850. The dollar closed at 3.241 Swiss francs, compared with 3.243 yesterday. In Paris, the dollar declined to 4.525 commercial francs from 4.552 yesterday, and to 4.48 financial francs from 4.525 yesterday. In London, it took $2.466 to buy one pound, compared to $2.459 yesterday.

In related news, a high-level committee of the Organization of Economic Cooperation and Development concluded two days of talks on trade and monetary questions. Paul Jolles, the Swiss representative chairing the meeting, said that the member governments "recognized that monetary, trade, investment and development aid problems have to be considered together, but that doesn't mean they have to be negotiated together." "There was no attempt," he added, "to decide what negotiations elsewhere (trade talks in Geneva, monetary reform talks in Washington) should encompass."

The United States has long been insisting that trade and monetary problems are interrelated while a number of its allies are not agreed.

Italian Reserves Lose $2.4 Billion Since Last June

ROME, March 20 (AP-DJ).—Italian Treasury Minister Giovanni Malagodi said today that Italy had "lost" $2.4 billion in monetary reserves between the end of June last year—when the pound began to float—and Feb. 9 this year. Of the total, $600 million were lost in the first 40 days of this year, he said.

He did not say exactly where these reserves went, but the extent of this drain has not appeared in Banca d'Italia summary statements because much of it was covered by foreign borrowings by state agencies that were reported by the agencies rather than by the central bank.

However, in attributing the loss to the "monetary storms surrounding the dollar and the deutsche mark," Mr. Malagodi implied that the bank's operation on foreign-exchange markets was the immediate cause.

Calls Rates Realistic

Mr. Malagodi, in an address to the joint budget, finance and treasury commission of parliament, also said that the de facto devaluation of the lira by 10 percent against the DM and its revaluation by 2 percent against the dollar "is certainly nearer to economic realities than the previous alignment."

He also implied that it would be some time before Italy would join the float, though he insisted that Italy's independent float is being conducted "in the closest collaboration" with other EEC countries.

Honda Asserts It Can Meet U.S. Clean Air Standards

By George C. Wilson

WASHINGTON, March 20 (WP).—The Japanese manufacturer of Honda cars and motorbikes said yesterday that its automobiles definitely will meet the U.S. clean air standards for 1975.

Moreover, the company said its clean-burning engine "can be mass-produced by any automobile manufacturer"—a statement which lays down the challenge to Detroit and other automobile capitals around the world.

American, Chrysler, Ford and General Motors all have asked the U.S. Environmental Protection Agency to back off the 1975 clean air standards because they are too tough for U.S.-made cars to meet.

EPA is holding two weeks of hearings to determine whether Detroit's request for a one-year delay in imposing the standards of the Clean Air Act of 1970 on 1975 cars should be granted.

Honda's testimony as EPA began its second week of hearings was the most damaging yet to Detroit's case. The U.S. automakers said that the Honda system for purifying engine exhausts would be good only on a limited variety of cars.

A group of Honda executives told EPA that not only does the firm's system work on the small Japanese cars, but it already has proved itself in tests on the Chevrolet Vega and will be tried on bigger engines soon.

Like the U.S. auto companies, (and Volkswagen, which said yesterday it could not meet the 1975 deadline), Honda executives say their company started out experimenting with catalytic converters—canister-like devices inserted between the engine and exhaust pipe which cause impurities to burn up rather than escape into the open air. However, Honda said it experienced the same kind of difficulties with the converters that Detroit now is complaining about—breakdown in materials and other troubles.

Honda switched to a system called Controlled Vortex Combustion Chamber—a means of burning the mixture of air and gasoline an unusually long time inside the engine itself, so carbon monoxide and hydrocarbons are used up without even entering the exhaust pipe.

2 British Firms Say Profit Rises

LONDON, March 20 (AP-DJ).—Two large British companies reported increases in profit today.

British Insulated Callender's Cables said net profit for the year rose to £13.97 million from £12 million in 1971.

The company declared a final dividend of 3.7625 pence a share, making a total of 8.125 pence, up from 7.75 pence.

Meanwhile British Oxygen said net profit rose to £2.3 million in the final quarter last year, up from £1.76 million in the same period a year earlier.

z—Sales in full.

Unless otherwise noted, rates of dividends in the foregoing table are annual disbursements based on the last quarterly or semi-annual declaration. Special or extra dividends or payments not designated as regular are identified in the following footnotes.

a—Also extra or extras. b—Annual rate plus stock dividend. c—Liquidating dividend. e—Declared or paid in preceding 12 months. h—Declared or paid after stock dividend or split up. k—Declared or paid this year, an accumulative issue with dividends in arrears. n—New issue. p—Paid this year, dividend omitted, deferred or no action taken at last dividend meeting. r—Declared or paid in preceding 2 months plus stock dividend. t—Paid in stock in preceding 2 months, estimated cash value on ex-dividend or ex-distribution date.

cld—Called. x—Ex dividend. y—Ex dividend and sales in full. x-dis—Ex distribution. xr—Ex rights. xw—Without warrants. ww—With warrants. wd—When distributed. wi—When issued. nd—Next day delivery.

vj—In bankruptcy or receivership or being reorganized under the Bankruptcy Act, or securities assumed by such companies. fn—Foreign issue subject to interest equalization tax.

Year's high and low range does not include changes in latest day's trading.

Where a split or stock dividend amounting to 25 per cent or more has been paid the year's high-low range and dividend are shown for the new stock only.

NEW YORK, March 20.—*Cash prices in primary markets as registered today in New York were:*

Chemical Bank
5th largest international bank in the U.S.A. or how a small laboratory gave up chemistry to do more for your money.

From palladium.

In 1823 we were called the New York Chemical Manufacturing Company: customers came in to buy a few pounds of palladium. The following year we changed our statutes and obtained permission to enter the banking business. Our reputation as financiers and the number of our clients grew so quickly (we were already doing more for our customers' money) that we had to choose between palladium and dollars. In 1844 we became Chemical Bank.

To dollars.

Today, 128 years later, our total assets exceed $13 billion. We have branches and representative offices throughout the world. And we do business with 60% of the non-American companies with annual sales of more than $2 billion.

To international operations.

Of our business done outside the U.S.A. a good part is in Europe. Our international business is larger than the total resources of most U.S. banks. Whatever the action needed or merely foreseen, maybe a routine transaction such as a foreign exchange operation, or the financing of projects between Frankfurt and Tokyo, Chemical Bank is in key money centers to give you first-class guidance backed by experience. No wonder our clients consider us top specialists for international deals. 128 years ago we may have switched from chemical formulas to banking formulas but we haven't forgotten the value of research. It leads to discoveries of even more sophisticated methods of international financing. We do more for your money. That's no paper formula, it's plain fact.

How to find us.

Main Office: New York. Branch Offices: Brussels, Frankfurt, London, Paris, Tokyo, Zurich and Nassau. Representative Offices: Beirut, Birmingham, Madrid, Milan, Bogota, Buenos Aires, Caracas, Rio de Janeiro, São Paulo, Mexico City, Hong Kong, Manila and Sydney. Correspondent Banks in over 185 nations.

CHEMICAL BANK

We do more for your money.

CB6 YP.

BANQUE DE FRANCE

The report of operations of the Banque de France for the 1972 fiscal year has just been remitted by the Bank's Governor to the President of the Republic.

A first chapter, devoted to foreign financial relations, recalls the operating difficulties of the international monetary system, evokes the problems which arise and analyzes the evolution of the gold and currency exchange markets. As a result of short-term capital flows, the balance-of-payments Account is showing a surplus. A few pages of the report are devoted to the problems raised by international financial and monetary co-operation, more particularly within the European Economic Community.

Monetary policy is the subject of an enlarged development. For the major part of 1972, the bank had to take into account the necessity of restraining the influx of foreign capital. From the month of September, the bank was able to adapt its action to the exigencies of the fight against inflation. It thus progressively increased its frequency of intervention in the monetary market. At the same time, in order to restrain expansion of bank loans, it raised noticeably the coefficient of obligatory reserves applicable to allocated loans. This resulted in a large increase in demand from the banking system for its participants.

The report also comments on the new statutes with which the Bank has been endowed by the Law of January 3, 1973, and the decree of January 30, 1973.

The conclusion emphasizes the assets that are available to the French Economy. In this respect, the prospects for 1973 appear favorable. It also throws light on the uncertainties caused by the instability of the international monetary system and inflationary pressures. The Bank warns of the consequences that would occur if the excessive development of bank loans continues. It finally appeals to the understanding and efforts of all, in order to assure a smooth and continued expansion.

BRIDGE

By Alan Truscott

On the diagramed deal from a recent New York tournament, one team handled a rare distribution more effectively than its opponent. In one room, South had the rare experience of being able to define a six-six distribution by bidding hearts once and then clubs three times. The second club bid, made over three no-trump, showed at least five-five in the rounded suits, and the final bid of five clubs guaranteed six clubs, and by inference six hearts. Notice that North's four no-trump bid was not Blackwood but a natural attempt to play in that contract: If a player who has bid three no-trump as an attempt to play in that contract later bids four no-trump, his bid is always natural.

NORTH
♠ KJ94
♡ 7
◇ AK9732
♣ 64

WEST
♠ AQ103
♡ QJ62
◇ 86
♣ Q97

EAST
♠ 8652
♡ 83
◇ QJ1054
♣ J2

SOUTH (D)
♠ 7
♡ AK10954
◇ —
♣ AK10853

Both sides were vulnerable. The bidding:

South	West	North	East
1 ♡	Pass	2 ◇	Pass
3 ♣	Pass	3 N.T.	Pass
4 ♣	Pass	4 N.T.	Pass
5 ♣	Pass	Pass	Pass

West led the spade ace.

Five clubs could not be defeated, although West had hopes. He led the spade ace and shifted to a diamond at the second trick. South took three winners in dummy, discarding heart losers, and then played to ruff one heart. He eventually lost a trump trick, and made exactly 11 tricks.

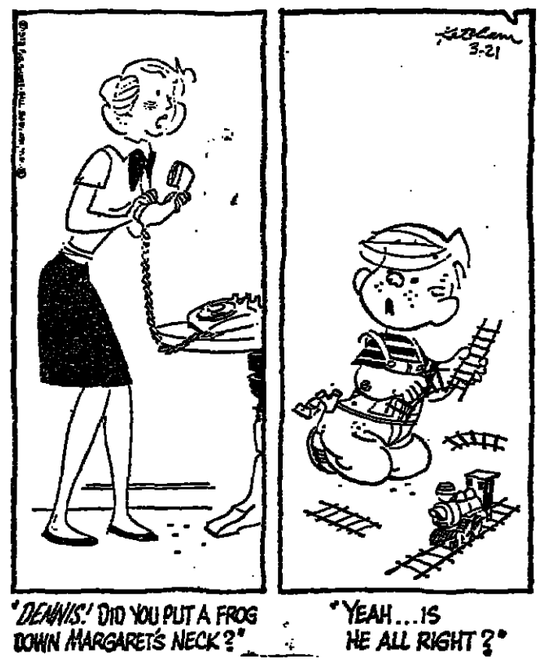

In the replay, the bidding followed the same course for the first two rounds, but, instead of bidding four clubs, South leaped aggressively to six clubs. After the same opening lead, this contract failed by one trick.

Oddly enough, the same defense of the spade ace followed by a diamond is good enough to defeat the natural-looking contract of four hearts. But the highly unnatural contract of three no-trump, which neither South player considered, would be made against any defense. The declarer ducks a round of clubs quickly and remains in control.

Yesterday's Jumbles: FOUNT SPURN PUDDLE COWARD

Answer: *Why he couldn't get off the bus*—IT WAS "NONSTOP"

BOOKS

SURFACING
By Margaret Atwood. 224 pp. Simon & Schuster. $6.95

THE AUTOGRAPH HOUND
By John Lahr. 239 pp. Knopf. $6.95.

Reviewed by Christopher Lehmann-Haupt

TWO first-rate books here, although . . . I worried every so often reading John Lahr's first novel, "The Autograph Hound." It is very clever: the idea of unfolding the seamy side of Times Square and environs through the eyes of Benny Walsh—busboy at that feeding station of stage-and-screen stars, The Homestead—whose transcendent obsession in life is to gather other people's signatures. But is cleverness enough? It is very inventive: the way Mr. Lahr festoons his story with the ribbons and bows of his hero's mad mind—the way Mr. Lahr has conjured up Benny's room, for instance, "twenty-five sneakers by fifty-two sneakers," with its "sports wall . . . just names and numbers." its movie wall, its political wall and its file cabinet full of autographs neatly pasted on 3-by-5 cards, with vital statistics and "REMARKS TO ME" typed on the opposite side. But will sheer inventiveness finally do?

And the tone is just right—the knowing, updated Runyonesque dialogue out of which the novel is largely constructed (Mr. Lahr is a theater critic when he is not writing first novels; judging from the dialogue here, he knows whereof he criticizes). And the trivia—oh, the endless trivia: they make such beautiful embroidery. Still, I worried, because beyond all this glitter, down where novels really live, I could not see a great deal going on.

Somehow, though, every time "The Autograph Hound" threatens to run aground—every time you think you're about to get fed up with the rich surface—Mr. Lahr bails out and finds new channels to explore, new depths of Benny's madness to sink into. And finally what we end up with is a novel that leans on tricks and gimmicks, but still stands as an accomplished tour de force, a stunning comment on show business (meaning the business of show). It is a novel, in short, that pops into your head all too easily, but then carooms around there until it hurts.

I had a few moments of anxiety, too, in Margaret Atwood's new novel, "Surfacing." (A young Canadian writer, she has published five books of poetry and a previous novel called "The Edible Woman.") For near the end, when the I-narrator of this brooding wilderness adventure finds herself abandoned by choice on a lake island in Quebec, I was afraid she was going to go off the deep end—go mad or commit suicide, that is—and thus short-circuit the story and reduce it in effect to mere anti-masculine propaganda, instead of leaving it the profoundly feminine story it has seemed up to this point.

It would have been a shame if "Surfacing" had faltered in this way, for up to this point Miss Atwood has not taken a false step. Up to this point, she has absorbed us completely ominous tale about a young an who, accompanied by a lover to whom she is indif and a young married coupl seem to her ideal, returns island home of her childh find out why her widower has suddenly and inex disappeared without a tr

Up to this point, Miss has peeled away her cha civilized skins with almost olent skill, revealing th quest, slaughter, famin death that crouch in the Up to this point she has ized everything—her pros up of inward-turning run tences: her protagonist's re memories of a drowning and something nameless baby she once bore but ab ed: the landscape of cr preyed upon by maraudin —into a hard metal surfa reflects the reverse image familiar masculine wildern venture. For here, instead Daerslayer or James Dickey permasculine Lewis, we woman who knows how t and kill and lead people t the woods, and who is sick heart over what she know female genitalia she once sketched on a wall. Miss A heroine reflects, "But of they were magic drawing the ones in caves. You d the wall what's important what you're hunting.")

So now at the end, Atwood's heroine was go opt out . . . if—having go the bottom of her indiffer men, having brought the d things in her past back surface, and having trick companions into leaving he on the island with the k the door through whic father has disappeared—I she was going to exit purs furies, I would have been pointed. It would have dim ed the novel for me . . . sh it into a death's head.

But again I needn't reall worried. Miss Atwood's onist doesn't opt out, go commit suicide, or renoun and civilization. The alone on the island turn be a rite of passage only ing of outer limits. At end . . . but I won't tell y more. And I trust you figured out where the fa gone.

Of course, I don't entir lieve the ending. Somethi me that Miss Atwood is ing through the motions and that her sense of re tion hasn't seeped down marrow yet. Still, I'm s Even if it is only moti ending rescues for me wh almost every other re thoroughly brilliant novel.

ench Report Griffith oped In Last Match

Emile Griffith

PARIS, March 20 (AP).—A doping test made on New York middleweight Emile Griffith after his draw March 12 with Max Cohen of France "showed positive results," the French Boxing Federation announced today.

Neither the substance that Griffith was supposed to have taken nor its possible effect on the former world champion was revealed in a two-line statement by Bernard Restout, president of the federation.

Restout said only that copies of the report would be sent to the New York Boxing Commission, the World Boxing Council and the European Boxing Union. No other action was taken.

Griffith was hampered by a cold during a week's training in Paris before the fight and was under medication. On the Wednesday preceding the Monday night bout, he stopped training entirely and visited a physician for a muscle strain in his back. Griffith then resumed workouts and his manager, Gil Clancy, said that he was in excellent physical condition before the 10-round main event at the Palais des Sports.

The fight between Griffith, 35, and Cohen, 32, was slow and without knockdowns. During the first two rounds, in which Griffith seemed particularly uneasy, Clancy continually yelled at him, "Work, for God's sake, get going. If you don't, you're going to lose."

Sources close to the French federation indicated that only the New York Commission and the World Boxing Council could take action against Griffith if he is to be sanctioned.

But they said that the French Boxing Federation could block Griffith from fighting again in France and could ask that the European Boxing Union extend the ban.

Lee Elder

Black Asking No Favors In Masters Entry

By Lincoln A. Werden

NEW YORK, March 20 (NYT). —Lee Elder of Washington asserted yesterday that he wanted "no favors" in the form of a special invitation from the Masters Golf Tournament, to which a black player has never been invited.

Although 18 congressmen have urged that he be invited, Elder insisted that he would "make the best of it" of the announcement by Clifford Roberts of the Masters committee that no invitation would be forthcoming for the April 5 event at Augusta, Ga., unless Elder met the qualifications set for all entrants.

Roberts, in replying to the group of representatives led by Herman Badillo, D., N.Y., said that he would be practicing discrimination "in reverse" were Elder to receive an invitation without meeting the qualifications.

"There is only one (way) left for me to get into the Masters field this year," Elder suggested. "That's if I can either win at New Orleans or Greensboro. That's certainly what I'm going to try to do." Winners of tour events automatically receive a Masters invitation. The New Orleans Open begins Thursday and the Greensboro, N.C., tournament March 29.

Elder expressed appreciation for the concern of the congressmen on his behalf. "They reminded me that I was good enough to play in the U.S. Open and the PGA Championship for the last five years and that I was 32d on the money list in 1972."

"One recommendation I would like to make," he added, "that might clear this whole matter of whether there is any alleged prejudice at the Masters. This would be to allow the leading 60 money winners of the past year to be automatically eligible. That's the procedure on the national tour for regular tour events that we play each week. This would be a fair way to clear up this whole matter of discrimination and nondiscrimination."

Elder said that he had no knowledge of the congressmen's action until he read about it in Sunday's newspapers. A spokesman for Badillo said yesterday that Roberts's response, given to the press late Saturday, had not been received. He asserted, "We don't intend to let the matter drop. Mr. Badillo made the same request of Mr. Roberts a year ago."

A Black Baseball Manager: Who Will Be First?

Frank Robinson Seen Likely But Many to Choose Among

By Joseph Durso

ST. PETERSBURG, Fla., March 20 (NYT).—Twenty-five years after Jackie Robinson broke the color line in the major leagues, baseball people are predicting that the first black manager will be appointed in the next season or two.

They also believe that the "pioneer" is now working as a player or coach in one of the 24 spring-training camps from Florida to California—and most of them predict that the man on the inside track is Frank Robinson of the California Angels.

In addition to Robinson, who just signed a two-year contract to play at $150,000 a season, the candidates include John Roseboro, a coach with the Angels; Maury Wills, who retired from the Los Angeles Dodgers this winter and recently became a baseball commentator with the National Broadcasting Company; Ernie Banks, now a coach with the Chicago Cubs, and Elston Howard, a coach with the New York Yankees.

Also, Bill White, broadcaster with the Yankees; Larry Doby, a coach with the Montreal Expos; Jim Gilliam, a coach with the Dodgers, and Willie Mays of the Mets.

Not Managing Now

There are no candidates now managing in the minor leagues, but Robinson has done more "homework" than anybody else. In four of the last five years, he has spent the winter working as a manager in Puerto Rico. And this winter, his Santurce team—which included major-leaguers from the mainland—won the pennant and playoffs, though not the Caribbean world series.

Why has it taken a quarter of a century to reach this stage in the black athletes' rise in baseball? Do the clubs have qualms about putting a black man in charge of a mixed team before a mixed audience? Are they more worried that the man they hire will someday have to be fired, as most managers are? Why haven't more black ballplayers aimed for the job by starting as managers in the minor leagues?

"I don't think it'll be like the Jackie Robinson thing all over again," said Monte Irvin, just elected to the baseball Hall of Fame after a career in the Negro leagues as well as the major leagues. I don't think white players would resist taking orders from a black manager anymore. I believe that a general manager will simply say, 'This is my man.' And the man will tell his players, 'Don't do it for me, do it for the club.'

Blacks in Football

"There are some black quarterbacks now who give orders in football, and the other guys don't quit. Bill Russell did a good job in basketball. So the thinking has changed, the old hangup is archaic. Today you play for the money."

"We now have a generation of black players who have established themselves for the first time," said Harry Dalton, general manager of the Angels and formerly Frank Robinson's boss with the Baltimore Orioles. "It'll happen in the next two or three years, and Frank is right at the top of the list or near it, as are people like Roseboro, Howard and Gilliam.

"The key to hiring a manager is personal contact. I know of no cases where a general manager hired one cold. He has to know the man over the years. And now we have teams in 24 cities that need managers, and when they're not happy with the incumbent, they'll be comparing black players for the job against white ones."

To some people in the business, Dalton and Frank Robinson already are following the path taken by Branch Rickey and Jackie Robinson in 1947, when Rickey was running the Brooklyn Dodgers and Jackie was the athlete he had selected for the great experiment. But Dalton and Frank Robinson both discount any grand scheme between them.

Wants to Help

"I don't have any covetous eyes for the first black manager," Dalton replied in a telephone interview from the Angels camp in Palm Springs. "I don't crave to be a latter-day Branch Rickey. But if the time ever comes, I'd like to help him, and he's aware of that."

"I want to play two more years," Robinson, who has played 17 seasons in both leagues and hit 522 home runs, said. "If I fall flat on my face, I'll walk away. But I would like to become a big-league manager, and if the right opportunity came along, I'd probably step down as a player.

"I've managed in Puerto Rico four years now, handling outstanding major and minor league players—mixed players, including Latin Americans—and that's tougher than managing in the majors."

For Wills, who considered playing in Japan before signing with NBC, the decision will be critical. In fact, when he replaced Sandy Koufax on the "Game of the Week" television team, he obtained an escape clause in his contract that would permit him to accept an offer as manager.

"The two best candidates now are Frank Robinson and myself," he observed clinically. "I can't see anyone else. But if we're passed over, it'll be another 10 years before someone else comes along."

Logical Decision

For Doby, the first black player in the American League, the decision also will be logical.

"It'll happen in the next year or two," he said. "Because we now have qualified people who took the trouble to prepare. It's a job of teaching not tokenism. We're not interested in that. I've talked about it with Wills, Banks and Henry Aaron, and they impressed me as possible managers. It'll happen because we can contribute."

"If Roy Campanella hadn't got hurt," recalled Irvin, now an assistant to the baseball commissioner, "he would have been managing in the 'bigs' several years now. He had the knowledge, the qualities, the charisma."

The short-lived Seattle club indicated interest in Bill White in 1969, but he was succeeding in broadcasting then and did not switch. The Washington Senators, the same year, decided on Elston Howard but then landed Ted Williams. The Chicago Cubs last year considered Banks, but Philip K. Wrigley reportedly felt he was "too nice a guy to fire someday." And as late as last winter, Herman Franks tried to buy the Yankees for a syndicate with Willie Mays lined up as manager—but the club was sold to Michael Burke and 14 partners.

Dalton did not share Wrigley's fear of someday being forced to dismiss the manager, even though the average tenure of a big-league skipper in recent years has been less than two seasons.

"I don't think firing him is the problem," he said. "Whenever you hire any manager, you run the risk of firing him. You go after the man you want. How different would that be from trading a black star from your club?"

"If he doesn't do the job, he's out," Irvin agreed. "If it happens that black players and fans resent it, meet the problem—head-on. I don't think the fans will picket the park.

"The main thing is that we now have a whole group of qualified black players and coaches who got their start after Jackie Robinson. But it's not the same problem. Branch Rickey needed an educated man who could conduct himself properly off the field under pressure. Now, any of the candidates has done it off the field, lived with white players, traveled with them, met the press, appeared on TV.

"Frank Robinson also is a changed man," he said. "He's matured. He led the Orioles for years. Doby has raised the batting averages of young men at Montreal. Ellie Howard has experience. Maury Wills was captain of the Dodgers.

"It'll happen. The Pittsburgh Pirates fielded nine black players a couple of times and nobody left the park."

Frank Robinson directs players in Puerto Rico, as manager of the Santurce club there.

AAU Stymies Travel by 5 To Games at South Africa

By Neil Amdur

NEW YORK, March 20 (NYT). —Requests by five top United States track and field athletes for travel permits and visas to compete in a multinational sports competition in South Africa starting Friday have drawn mounting opposition.

The Amateur Athletic Union, governing body for international track and field in the United States, must issue travel permits before any American athlete can compete abroad.

Permits generally are granted routinely, upon request. But today, an AAU official in Indianapolis conceded that no travel permits had been issued to the five athletes for the South African trip and that an emergency meeting of the organization's track and field board might have to be called to resolve the issue.

Two black congressmen, Ralph H. Metcalfe, D., Ill., a former Olympic gold medalist in track and field, and Charles Diggs, D., Mich., already have sent strongly worded telegrams to the AAU urging the withholding of permits in view of South Africa's policy of apartheid.

Formal Appeal Issued

The American Committee on Africa also has issued a formal appeal urging the American athletes to boycott the event, the South African – Open Games, which will run through April 7 in Pretoria.

The athletes are Steve Smith, world indoor record-holder in the pole vault; Al Feuerbach, the world indoor record-holder in the shot put; Dwight Stones, Olympic bronze medalist in the high jump; John Powell, a fourth-place Olympic finisher in the discus, and Jim Bolding, a world-class intermediate hurdler.

Smith, one of the most popular competitors during the recent indoor season, and Feuerbach, another U.S. Olympian, visited the South African consulate in San Francisco yesterday and filed formal visa requests.

All five athletes are white. So is Tom Jennings, their coach and manager, who insists that the group "is not politically oriented."

"We're not going because we're supporting apartheid," Jennings said by phone from Los Angeles. "It's just another track meet in an interesting place for us."

Sympathizes With Struggle

From San Jose, Feuerbach stressed that "I sympathize with many things, like the black struggle in this country."

"I'm concerned, but not active," Feuerbach added. "My goal is to be No. 1 in the world in my event and to compete. I can't conceive of social and economic implications in this."

South Africa's role in international athletics has been the source of intense political debate in recent years. The country has been banned from the last two Olympic Games and from many prominent international team events such as the Davis Cup tennis competition.

Clemente Is Hall-of-Famer

ST. PETERSBURG, Fla., March 20 (AP).—Roberto Clemente, the late batting star of the Pittsburgh Pirates, was voted into baseball's Hall of Fame today in an unprecedented special election by the Baseball Writers Association of America.

The normal five-year waiting period was waived for the Puerto Rican, who died last New Year's Eve at age 38 in the crash of a plane taking relief supplies to earthquake victims of Nicaragua.

Clemente becomes the first Latin American baseball player to be named to the Hall of Fame.

occer Cup Tournaments ock Full of Imponderables

By Brian Glanville

DON, March 20 (IHT).— row's program of return s in the three European urnaments is full of im- ables.

Upset and Real Madrid ister the *coup de grâce* to us and Dynamo Kiev, ively, after their scoreless ay from home?

Derby County wipe out -0 deficit against Spartak at the Baseball Ground?

Bayern Munich save a restige for West German l after their thrashing in dam?

e are the four matches in dor European Cup. In the mers' Cup, Milan, truly the crest of a wave with tough midfield player, Benetti, the canary fan- n admirable form, must dispatch dull Spartak .

; United, with a five-goal cannot go down by such gin in Bucharest against though doubtless there some frantic kicking. last season, on their way ing the UEFA Cup, were y maltreated and there are left to pay, scars plainly after Leeds's easy victory apid at Elland Road. In est they won't have their executioner, Allan Clarke, s been suspended.

can safely assume that he holders, are through to nifinals. We can assume ey will win the trophy third time in succession. can touch them, when Bayern, the second favorites, were taken so mortifyingly to pieces?

True, Gerd Muller, the German bombardier, wasn't really fit to play; but Ajax's own splendid center-forward, Johan Cruyff, perhaps should not have played either. Certainly he wasn't fully fit.

Ajax won, 5-0, at the Munich Olympic Stadium in a pre-season friendly match. It is doubtful that they will do so well again. Bayern's mad and maddeningly defensive tactics in Amsterdam, where Muller was often the only man upfield, suggested a dreadful inferiority complex toward Ajax. Udo Lattek, the team manager, was heavily criticized. Can it be that the West German star is waning?

The Ujpest Dozsa-Juventus match is fascinating. The Italian critics did not stint their praise of the Hungarians in Turin, where they were said to have outclassed the Italian champions, although they could not score. In Budapest, however, the Turin club will be able to play the counter-attacking game most familiar to it. "La Juve" seem to be off the boil. Jose Altafini, their 34-year-old Brazilian center-forward, whose goals were giving them so many league victories, has lost his edge. And the team as a whole was somewhat demoralized by Italy's failure to play attractive football against Turkey in their World Cup match in Istanbul, when Juventus players provided the most for their side.

Spurs, holders of the UEFA Cup, will be under siege by Vitoria, in Setubal. The Portuguese played a canny defensive game at Tottenham where their goalkeeper, Torres, after a poor start, was almost unbeatable. But they were outrageously defensive, and though their best forward, the Brazilian Dudu, is expected to play tomorrow after missing the Tottenham game, Spurs and Martin Chivers may find more space to exploit. Besides, Setubal's 3-0 beating by Benfica suggests that they are not supermen.

Observer

Feeling C.R.E.E.P.Y.

By Russell Baker

WASHINGTON. — Correspondence file: Committee for the Re-Election of the President, Washington, D.C. Dear Committee:

I have a sinking feeling, which gets worse with each day's newspapers, that I may be the only person in America who did not contribute $200,000 to the campaign to re-elect the President. Is this correct?

Baker

(Signed) Titcomb Barnes.

Dear Mr. Barnes:

We regret our inability to supply the information you request, but our files have been badly depleted ever since the ITT document shredder broke into our office one weekend when everybody was out of town and shredded all the records it could get its blades on.

If you have reason to believe that you did not give your $200,000 we will gladly accept it at this time. As you may know from reading the papers, we have, fortunately, re-elected the President; however, our need for contributions of $200,000 continues as we feel obliged to return to donors a number of multiple-hundred-thousand-dollar contributions for reasons that cannot be discussed in the mails without violating the great constitutional guarantee of executive privilege.

(Signed) C.R.E.E.P.

Dear Committee:

Why should I suffer because you can't keep ITT's shredders out of your records? Law and order was what I was voting for when I gave my $200,000. And now I find you can't even police your own files.

When I put up the $200,000, you were free enough with promises about how somebody might just possibly find time to look into that little tax problem of mine, but now you act like you've never heard of me. Is that the spirit of Republicanism?

(Signed) Titcomb Barnes.

Dear Mr. Barnes:

Don't try getting short-tempered with us. To us, Sir, $200,000 donors are a dime a dozen. However, if you can show us some record of your contribution, such as a photograph of Maurice Stans counting your gift, we would be delighted to restore a more friendly tone to the prose style of our correspondence.

(Signed) C.R.E.E.P.

Dear Committee:

The man who came for my $200,000 was a former Watergate bugger for the CIA. A man like that knows all the tricks.

You don't think a man that smart was going to let me take his picture? However, I did take a picture of the little black bag in which he carried away my *$200,000 in one-dollar bills.* See enclosed snapshot.

(Signed) Titcomb Barnes.

Dear Mr. Barnes:

Former high-altitude photo analysts at the Pentagon, men capable of identifying a left-handed plumber in a crowd *picture of 30,000 people taken* from an altitude of 65,000 feet, say that the black bag in your snapshot appears to be a child's tin lunchbox which has been hurriedly rubbed with black shoe polish.

We have also learned that you do indeed have a "little tax problem" with the Internal Revenue Service. Very little.

You have been blustering hollow threats to "go to tax court" rather than pay the additional $63 which your Internal Revenue Service auditor has decided to squeeze out of you in order to meet his collection quota and get a nice promotion at higher salary, which you will help pay through the next tax increase.

What's more, we are informed that virtually all your visible income is salary. Under present tax law, it would take a man 94 years to save enough salary after taxes to give $200,000 to the Committee to Re-Elect the President. You do not write like a 94-year-old man. You write like a young man who pities himself because he does not have $200,000 to give to the committee.

(Signed) C.R.E.E.P.

Dear Committee:

Suppose I pledge to give my $200,000 when I am 94? Do you think anyone could see his way clear to getting that tax auditor off my back?

(Signed) Titcomb Barnes.

This last letter is still unanswered.

It May Be Cheese But It Isn't Parmesan

PARIS (IHT).—I read in the International Herald Tribune (People, March 17-18), that the United States Food and Drug Administration has reduced the legal time required for aging American "Parmesan" cheese from 14 months to *10.* "You can't tell the difference," says the FDA, and if it means the difference between 14-month-old cheese and 10-month-old cheese, it may be right. Neither of them would be considered fit to eat by Italians. Italian Parmesan—a tautological term, since *all* Parmesan is Italian—run-of-the-mill, ordinary, everyday, take-it-in-your-stride Parmesan, is aged at least two years; connoisseurs refuse to touch it under four.

There is no such thing as American Parmesan. That American cheese manufacturers call one of their products Parmesan does not make it so. They are, indeed, violating an international convention, that of Stresa and The Hague, negotiated in 1952 and applied one year later. Under this agreement, only four cheeses are listed in Group A, which means that their names cannot be used anywhere in the world except in their places of origin. Parmesan (full name, Parmigiano Reggiano) is one of them. (The other three are Gorgonzola and Pecorino Romano, both Italian, and Roquefort, French).

Another Group

What American cheese makers call Parmesan could not be so named even if Parmesan belonged only to Group B, which is composed of classic cheeses which *may* be made elsewhere than in their places of origin, provided the established formula for that cheese is followed. Curnonsky, the French "prince of gourmets," used to carry in his pocket the label from a box of cheese called "Texas Camembert," which he produced from time to time in derision or indignation, as his mood ran, as an example of arrant fraud; but Curnonsky was wrong. Camembert, a cheese of Group B, can legally be made anywhere if the classic Camembert cheese-making methods are followed and if the place of origin is indicated on the container. Texas Camembert, under the Stresa convention, is perfectly admissible; American Parmesan is not. It would not be admissible even if Parmesan were in Class B because it does not conform to the Parmesan formula—first of all, in not being sufficiently aged.

American Parmesan is therefore a fraud; and the FDA adds insult to injury when it intimates that the counterfeit is better than the genuine article by asserting that American manufacturers had greatly refined the cheese-making methods used in the Italian provinces of Parma and Reggio. "Refined," of course, is an imprecise word. What does it mean in this case—cutting corners?

It would be difficult to improve on the process by which Parmesan cheese is produced, on the territory as carefully marked off by Italian law as are the areas on which fine wines are produced—all of the provinces of Parma, Reggio and Modena, the province of Bologna as far east as the Reno river, and that part of the province of Mantua which lies south of the Po river. It begins with the sowing of the pastures with selected mixed grasses and clover. Next comes the choosing of the cows which are to graze on them. They produce what is reputed to be the richest milk in Italy, with the possible exception of that of Padua, which makes Parmesan-type too, but obediently calls it *grana padorana*—*grana*, describing the coarse-grained texture of the cheese, is the usual name for all Parmesan-type cheeses produced outside of the legally defined Parmesan area: *grana americana* would be an acceptable name for the American cheese if it were made in the approved fashion.

Of this superior milk, only that given between April 15 and November 15, when the pasturage is at its most lush, is used for Parmesan cheese. The milk is so dense that no separator is required to arrive at the skimmed milk from which the cheese *is made; allowed to stand, it separates* naturally. The skimmed milk is fermented and cooked briefly until the curd separates. The curd is then turned into the great cartwheel forms of this cheese, and is dried, drained, pressed, colored, washed, brushed, scraped and rubbed with oil. Now semi-fat and firm-fleshed, it goes into a cool, damp room where it remains for a year. It is then sealed from further penetration by air with a coating called *fumo nero,* which means literally "black smoke"; actually it is burnt umber earth, applied over a coating of wine or of oil pressed from grape seeds. Thus protected, it goes into the warmer aging chamber, kept somewhat more humid.

Aging Process

After a year there, it *can* be taken out and placed on the market, and even called *vecchio* (old), but Parmesan fanciers are not deceived. They demand that it spend at least three years in the warm aging chamber, for a total of four years from the time of its initial fabrication. It may then be sold as *stravecchio,* very old. Many connoisseurs demand another year of aging: then they have *stravecchione (very extra old).* Parmesan, like wine, improves with age, up to a limit; the limit is about 20 years.

For an Italian, the difference between a Parmesan cheese aged for 14 months and one aged for 10 months would indeed be negligible, like the difference between a green banana which would require a month to ripen and one which would require a month and a week.

Parmesan is a very old cheese. Its birthplace was the fertile Enza valley between Parma and Reggio, which still makes the best Parmesan, even when compared to other cheeses in the official area, where they are *all* good. Parmesan has been produced there for 2,000 years. Boccaccio wrote about it in the 14th century and in the 16th Francesco Maria Grapaldo said that "in our day, Italy's greatest glory comes from Parmesan cheese." It was certainly appreciated in London, where, Pepys recorded, cheesemongers dug a deep pit during the great fire of 1666, in which they buried their stocks of Parmesan to preserve them from the heat.

Excellent *grana* is made on the fringes of the Parmesan territory proper, in Piacenza and Ferrara, for instance, and even as far away as Lodi in Lombardy, where so much of it was being produced by the region's 30,000 cows in 1850 that Alexandre Dumas was betrayed into the monumental error of asserting in his "Grand Dictionnaire de Cuisine" that Parmesan was not made in Parma at all, but only in Lodi!

The FDA has not yet asserted that real Parmesan is not made in Parma but only in the United States, but give it time. It has already remarked that reducing the ripening time of the American cheese will permit the production of "Parmesan cheese with the slightly milder flavor preferred by the majority of consumers." One would like to believe that it is a libel on the majority of American consumers to accuse them of preferring Parmesan divested of one of the characteristics of Parmesan but, after all, this is not really the crux of the matter. The real explanation for the decision to permit a deterioration in the quality of American "Parmesan" is disarmingly introduced by the word also. The new regulation, People said, will *also* save manufacturers 3.2 cents per pound.

Also! Hmm.

Associated Press

Desi Arnaz Jr. and Liza Minnelli.

PEOPLE: *Desi Arnaz Jr. Plans To Marry Liza Minnell*

Liza Minnelli, 26, and Desi Arnaz Jr., 21, say they plan to marry soon. Arnaz, son of Lucille Ball and Desi Arnaz, said the date "is not going to be kept a secret. When we have set the *exact date, we will let everybody* know." He and Liza, daughter of the late Judy Garland and film director Vincente Minnelli, are in London for a five-day visit.

A Munich haberdasher advertised the grand opening of his shop by promising complete new outfits to the first five men who walked through the door naked. Some 36 prospects lined up in freezing early-morning weather before the announced opening on Saturday. The owner, who was stunned that anyone took the gag seriously, was forced to open the door prematurely. But he made good his promise, outfitting the first five in new clothes. The other 31 got underwear and socks.
